Release of a Parameter File for the PG-FP5 Flash Memory Programmer

We will release a new parameter file for use with the PG-FP5 flash memory programmer.

This parameter file is a text file which contains the information required to use the PG-FP5 for writing to certain target MCUs.

Refer to the URL below for an overview of the PG-FP5.

https://www.renesas.com/pg_fp5

---

1. New Parameter File
   RX Family
   PR5-R5F571M V1.00 (for the RX71M group), supporting the R5F571MF, R5F571MG, R5F571MJ, and R5F571ML MCUs

2. Obtaining Parameter Files
   Download the parameter files you need from the web page at:
   https://www.renesas.com/pg_fp5_download
   The revised parameter files will be placed on the site on March 5.
   For details on how to install them, see Chapter 3 of the PG-FP5 Flash Memory Programmer User's Manual.

3. Firmware, FPGA Data, and Programming GUI
   For the versions of the firmware, FPGA data, and programming GUI necessary to use the revised parameter files, see the Parameter Files Release Note on the web page at:
   https://www.renesas.com/pg_fp5_documentation
   We plan to have the release note on the site from March 5.
