

Overview

If V_{DD} falls below specification and recovers, the part may enter an undetermined mode of operation. Users can return to normal operation after a V_{DD} glitch/droop event by following a simple procedure. This reset procedure can be through software or hardware means.

Symptoms

A part may have entered this unknown state if the DATA registers have unexpectedly stopped updating, or oscillate around 0 or full scale range. The ability of a part to communicate over I²C is not affected, but a user may find that registers read back different values than originally programmed to.

Technical Explanation

When V_{DD} sinks to approximately 1.8V or below, some of the part's registers may change their state. When V_{DD} recovers to 2.25V (or greater), the part may thus be in an unknown mode of operation. The user can return the part to a known mode of operation either by (a) setting $V_{DD} = 0V$ for 1 second or more and then powering back up with a slew rate of 0.5V/ms or greater, or (b) via I²C, disable all ALS/PROX conversions, clear the test registers and then rewrite all registers to the desired values.

Methods of Restoring Part to Normal Operation

Hardware (V_{DD}) Reset Procedure

One way to restore the part to normal operation mode is to set V_{DD} to 0V for 1 second or more. A minimum of one second is needed for the internal capacitances of the part to fully discharge. When powering the part up, please ensure a slew rate of 0.5V/ms or greater to ensure that the part's power-on reset is activated.

Software (I²C) Reset Procedure

If the user desires to not alter V_{DD} , the part can be reset by first clearing any internal TEST registers, then disabling ALS/PROX conversions and finally rewriting all registers as desired.

After power-up, or if the user's power supply temporarily deviates from our specification (2.25V to 3.63V), Intersil recommends users wait ~1ms or more, then proceed with the following procedures for each Ambient Light Sensor architecture.

FOR ISL29001, ISL29002

1. Write command 0x8C
2. Rewrite all registers to the desired values

FOR ISL29003, ISL29004, ISL29010, ISL29012, ISL29013, ISL29015, ISL29020

1. Write 0x00 to register 0x00
2. Rewrite all registers to the desired values

FOR ISL29011, ISL29018, ISL29021, ISL29023, ISL29033

1. Write 0x00 to register 0x08
2. Write 0x00 to register 0x00
3. Rewrite all registers to the desired values

FOR ISL29028, ISL29030, ISL29040, ISL29042

1. Write 0x29 to register 0x0F
2. Write 0x00 to registers 0x0E, 0x0F, 0x01 (in that order)
3. Rewrite all registers to the desired values

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
"Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.
"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.
Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.
(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.
(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
