[Net sales]

Consolidated net sales for the six months ended September 30, 2014 remained unchanged year on year to 416.9 billion yen. This result was mainly caused by steady sales of automotive and industrial semiconductors, increase in demand for display driver ICs for small- and medium-sized panels, as well as improved exchange rate, despite a decrease in both sales from semiconductors, including those for consumer electronics devices, and sales from others resulting from the selection and concentration of businesses.

Sales from semiconductors for the six months ended September 30, 2014 were 400.8 billion yen, a 0.9% increase year on year.

[Operating income (loss)]

Operating income for the six months ended September 30, 2014 was 50.5 billion yen, 29.8 billion yen improvement year on year. This was mainly owing to: continued strong growth of the sales of automotive and industrial semiconductors; increased sales from improved exchange rate; and improved earnings structure, including the improvement of gross profit ratio, through implementation of the structural reform measures.

[Ordinary income (loss)]

Ordinary income for the six months ended September 30, 2014 was 49.1 billion yen, mainly due to non-operating loss of 1.4 billion yen from recording non-operating expenses of 3.3 billion yen including interest expenses, etc.

[Net income (loss)]

Net income for the six months ended September 30, 2014 was 35.1 billion yen, 47.9 billion yen improvement year on year. This was mainly due to improved operating income and ordinary income in addition to decreased special loss year on year, especially the business structure improvement expenses.

[Net sales]

Consolidated net sales for the three months ended September 30, 2014 were 207.7 billion yen, a decrease by 4.7% year on year. This decrease was caused by a decrease in sales from semiconductors, which is the core business of the Group, and sales from others.

[Sales from Semiconductors]

Sales from semiconductors for the three months ended September 30, 2014 were 199.6 billion yen, a 3.9% decrease year on year.

The sales breakdown for "Automotive" and "General purpose," the two application categories that constitute the main business of the Group, and for "Other semiconductors" not belonging to the above two application categories, is as follows:

Automotive Business: 78.8 billion yen

The automotive business includes the product categories "Automotive control," comprising semiconductor devices for controlling automobile engines and bodies, and "Automotive information," comprising semiconductor devices used in automotive information systems such as navigation systems. The Group supplies microcontrollers, analog & power semiconductor devices, and system-on-chip (SoC) products in each of these categories.

Second-quarter sales for the Automotive business were 78.8 billion yen, an increase of 8.1 % year on year. Sales increased in both the "Automotive control" and "Automotive information" categories.

General-Purpose Business: 119.7 billion yen

The general-purpose business includes the product categories "Industrial/Home electronics," comprising semiconductor devices for industrial equipment, white goods, etc., "OA/ICT," comprising semiconductor devices for office automation (OA) equipment such as copy machines and information and communication technology (ICT) equipment such as network infrastructure, and "General-purpose," comprising general-purpose semiconductor devices for other applications. The Group supplies microcontrollers, analog & power semiconductor devices, and SoC products in each of these categories.

Second-quarter sales for the General-purpose business were 119.7 billion yen, a decrease of 10.4% year on year. This was mainly due to the Group's promotion of selection and concentration of businesses which led to decreased sales in the "OA/ICT", "General-Purpose" and "Industrial/Home electronics" categories.

Other Semiconductors: 1.0 billion yen

Sales of Other semiconductors include production by commissioning and royalties.

Sales of other semiconductors for the three months ended September 30, 2014 were 1.0 billion yen, a 17.5% decrease year on year.

[Sales from others]

Sales from others include non-semiconductor products sold on a resale basis by the Group's sales subsidiaries and development and production by commissioning conducted at the Group's design and manufacturing subsidiaries.

Sales from others for the three months ended September 30, 2014 were 8.1 billion yen, a 19.8% decrease year on year.

[Operating income (loss)]

Operating income for the three months ended September 30, 2014 was 23.5 billion yen, a 12.6 billion yen improvement year on year. This increase was mainly caused by increased sales from improved exchange rate and improved earnings structure, including the improvement of gross profit ratio, through implementation of the structural reform measures.

[Ordinary income (loss)]

Ordinary income for the three months ended September 30, 2014 was 23.8 billion yen, mainly due to non-operating income of 0.2 billion yen from recording non-operating expenses of 2.0 billion yen including exchange profits, etc, despite a recording of non-operating expenses of 1.8 billion yen, including interest expenses, etc.

[Net income (loss)]

Net income for the three months ended September 30, 2014 was 13.9 billion yen, a 22.7 billion yen improvement year on year. This was mainly due to improved operating income and ordinary income in addition to decreased special loss year on year, especially the business structure improvement expenses.

1.2 Consolidated Financial Condition

1.2.1 Total Assets, Liabilities and Net assets

Total assets at September 30, 2014 were 836.8 billion yen, a 39.9 billion yen increase from June 30, 2014. This was primarily due to improved free cash flows with no additional cash outgo from structural reform measures which resulted in increase in cash and deposits in the three months ended September 30. Net assets were 248.6 billion yen, a 25.1 billion yen increase from June 30, 2014. This was mainly due to improved foreign currency translation adjustment from depreciation of yen in addition to recording of net income of 13.9 billion yen, in the three months ended September 30.

Equity increased by 24.0 billion yen from June 30, 2014 and the equity ratio was 27.9%. Interest-bearing debt decreased by 1.3 billion yen from June 30, 2014. Consequently, the debt to equity ratio dropped to 1.15.

1.2.2 Cash Flows

	Three Months ended September 30, 2013	Three Months ended September 30, 2014
	Billions of yen	Billions of yen

Cash and cash equivalents at the beginning of period Cash and cash equivalents at the end of period	95.8 239.3	251.8 288.2

(Net cash provided by (used in) operating activities)

Net cash provided by operating activities for the three months ended September 30, 2014 was 49.5 billion yen. This was mainly due to recording of income before income taxes in the amount of 18.1 billion yen; adjustment of non-expenditure items including depreciation and amortization, etc., and increase in accounts payable-other and accrued expenses.

(Net cash provided by (used in) investing activities)

Net cash used in investing activities for the three months ended September 30, 2014 was 14.9 billion yen, mainly due to the purchase of property, plant and equipment and purchase of intangible assets.

The foregoing resulted in positive free cash flows of 34.7 billion yen for the three months ended September 30, 2014.

(Net cash provided by (used in) financing activities)

Net cash used in financing activities for the three months ended September 30, 2014 was 4.8 billion yen.

1.3 Consolidated Forecasts

The Group reports its consolidated forecasts on a quarterly basis because of the difficulty of forecasting full-year results with high accuracy due to the short-term volatility of the semiconductor market.

The figures of the consolidated forecasts for the nine months above are sum of the results of the six months ended September 30, 2014 and the forecasts of the three months ending December 31, 2014. The consolidated forecasts for the nine months ending December 31, 2014 are calculated at the rate of 102 yen per USD and 138 yen per Euro.

The statements with respect to the financial outlook of Renesas Electronics Corporation and its consolidated subsidiaries are forward-looking statements involving risks and uncertainties. We caution you in advance that actual results may vary materially from such forward-looking statements due to several important factors.

2. Others

2.1 Changes in Significant Consolidated Subsidiaries

Due to the restructuring of wholly owned subsidiaries of the Company: Renesas Semiconductor Manufacturing Co., Ltd.(Engaged in the semiconductor front-end production business) and Renesas Semiconductor Package & Test Solutions Co., Ltd.(Engaged in the semiconductor back-end production business), Renesas Yamagata Semiconductor Co., Ltd. and other eight companies are excluded from the Group by means of absorption-type merger in the first quarter of the fiscal year ending March 31, 2015.

2.2 Adoption of Special Accounting Methods for Quarterly Consolidated Financial Statements

(Calculation of tax expenses)

Tax expenses are calculated by multiplying income before income taxes for the second quarter of the fiscal year ending March 31, 2015 by a reasonably estimated effective tax rate against income before income taxes for the fiscal year including the second quarter, while applying tax effect accounting.

2.3 Changes in Accounting Principles, Changes in Accounting Estimates and Corrections of Prior Period Errors

(Changes in accounting principles)

From the first quarter of the fiscal year ending March 31, 2015, the Group has adopted the provisions set forth in Clause 35 of the "Accounting Standard for Retirement Benefits" and in Clause 67 of the "Guidance on Accounting Standard for Retirement Benefits" for "Accounting Standard for Retirement Benefits" (ASBJ Statement No. 26, issued on May 17, 2012) and "Guidance on Accounting Standard for Retirement Benefits" (ASBJ Guidance No. 25, issued on May 17, 2012). As a result of this adoption, the calculation method of retirement benefit obligations and current service costs has been reviewed, and the method of attributing expected benefit to periods has been changed from mainly a point-based or straight-line method to a benefit formula basis. Furthermore, the calculation method of the discount rate has also been changed.

The adoption of the accounting standards is subject to the transition treatment set forth in Clause 37 of the "Accounting Standard for Retirement Benefits", and effects of the change in the accounting standard for the calculation method of retirement benefit obligations and current service costs are adjusted on the "Retained earnings" of the net asset section.

Consequently, the beginning balance of the "Net defined benefit liability" for the six months ended September 30, 2014 was increased by 25,275 million yen, while that of the "Retained earning" was decreased by 25,074 million yen. Furthermore, the impact on operating income, ordinary income and Income before income taxes and minority interests for the six months ended September 30, 2014 is negligible.

(Transfer of subsidiary's shares)

- 1. Outline of the business divestiture
- (1) Name of the buyer Synaptics Holding GmbH (hereafter "Synaptics Holding")
- (2) Nature of the divested business Design, development, sale, and marketing of LCD drivers and controllers for small- and medium-sized LCD panels
- (3) Main reasons for the divestiture

As outlined in the Company's press release, "Renesas Electronics Shows Direction of Renesas Group," issued on August 2, 2013, the Company identified fields and regions where growth is expected in the medium to long term and areas where it can outpace the competition, and will focus on three fields where it has strengths and can compete effectively: automotive (automotive control and automotive information), industrial/networking (industrial/home appliance, OA and ICT), and general-purpose products. In parallel, the Company has been carrying out structural reforms aimed at creating an organization that is consistently profitable, even when exposed to risks (natural disasters, market stagnation, etc.).

Renesas SP Drivers (hereafter "RSP") was established in 2008 as a joint venture of display driver IC business, which does not fall under the Company's three focus fields. While its operation is focused on design and development, RSP also offers manufacturing service by outsourcing its production to foundries. RSP has continued to perform well in recent years, buoyed by vigorous demand for smartphones and tablet devices.

Under such circumstances, based on its structural reform policies, the Company has been looking into the possibility of transferring ownership to another company which focuses on display driver IC business and also is expected to proactively invest its management resources into this business.

Having been approached by Synaptics Incorporated (hereafter "Synaptics") with an offer to purchase all of the Company's shares in RSP, the Company evaluated the offer and reached a conclusion to transfer the shares to Synaptics Holding, a wholly-owned subsidiary of Synaptics.

- (4) Date of divestiture October 1, 2014
- (5) Overview of transactions including statutory form The Company had transferred all of the common stocks of RSP with cash consideration.
- 2. Overview of accounting treatment scheduled

This transfer will be accounted in accordance with "Accounting Standard for Business Divestitures" (ASBJ Statement No.7, issued on December 26, 2008) and "Revised Guidance on Accounting Standard for Business Combinations and Accounting Standard for Business Divestitures" (ASBJ Guidance No.10, issued on December 26, 2008).

Gain (Loss) on transfer of the business has not been recognized for the six months ended September 30, 2014.

3. Approximate amount of income (loss) pertaining to divested business recorded in the consolidated statement of operations for the six months ended September 30, 2014

	(Millions of yen)
Net sales	38,636
Operating income	7,976

(Execution of early retirement incentive program)

At the board meeting held on October 29, 2014, the Company resolved the implementation of an early retirement incentive program.

1. Reason for the execution

On October 30, 2013, with an aim of realizing a company with a solid, profitable financial base, the Group has formulated a reform plan, and realignment of design and development sites, revision of its personnel systems and others measures have been executed along with the reform plan.

The Company has decided to implement an early retirement program to offer special incentives and outplacement support for those employees who are unable to comply with the company's reform plan and other measures, or those employees who are unable to transfer to other sites to follow the reorganization policy at the design and development sites, etc.

2. Outline of the early retirement incentive program

- (1) Eligibility: Among the employees of the Company and its domestic subsidiaries in Japan who are 35 or older (All employees required to move from their current residence as a result of the realignment of the design and developments sites are eligible regardless of age).
- (2) Number of Applicants eligible for the program: Approximately 1,800
- (3) Application Period: December 10, 2014 to December 19, 2014 (planned)
- (4) Retirement Date: January 31, 2015
- (5) Benefits: The Company will offer special incentives in addition to their retirement payment to employees voluntarily taking early retirement. In addition, outplacement support will be provided through an outside agency for those who request it.

3. Impacts on the financial results

At the moment, it is very difficult to reasonably estimate the impacts of the early retirement incentive program as we have not started the application process yet.

Forward-Looking Statements

The statements in this press release with respect to the plans, strategies and financial outlook of Renesas Electronics Corporation and its consolidated subsidiaries (collectively "we") are forward-looking statements involving risks and uncertainties. We caution you in advance that actual results may differ materially from such forward-looking statements due to several important factors including, but not limited to, general economic conditions in our markets, which are primarily Japan, North America, Asia, and Europe; demand for, and competitive pricing pressure on, products and services in the marketplace; ability to continue to win acceptance of products and services in these highly competitive markets; and fluctuations in currency exchange rates, particularly between the yen and the U.S. dollar. Among other factors, downturn of the world economy; deteriorating financial conditions in world markets, or deterioration in domestic and overseas stock markets, may cause actual results to differ from the projected results forecast.
