Shipment of the Emulation Pod --M38000TL2-FPD-- for the 740 MCU Family to Be Discontinued

We inform you that we are discontinuing shipment of the emulation pod, M38000TL2-FPD, for the 740 MCU family.

1. Product Concerned

M38000TL2-FPD, the emulation pod for the 38000, 740, and 7200 series, 740 family

NOTICE:

The 7641 and 7643 groups of MCUs are supported by the M37641T2-RPD-E emulation pod, not the M38000TL2-FPD.

2. Description

We have ended production of the M38000TL2-FPD and are discontinuing its shipment at the end of December, 2005.

3. Substitute

Please substitute the M38000T2-CPE compact emulator for the M38000TL2-FPD emulation pod and the PC4701U emulator.

4. Technical Support

We continue technical support of the M38000TL2-FPD. Note, however, that the operations of the M38000TL2-FPD may not be guaranteed for new emulator MCUs because of the difference between them in timing of operations.

So we encourage you to use the M38000T2-CPE, a compact, economical- priced emulator.
