RENESAS Tool News

The Device File Updater Specific to the C/C++ Compiler Package for the SuperH RISC engine Family Revised to V.1.11

We have revised the device file updater specific to the C/C++ compiler Package for the SuperH RISC engine Family from V.1.10 to V.1.11.
For an overview of device file updaters, see:
https://www.renesas.com/dfu
The above URL is one of our global sites.

1. Supporting C/C++ Compiler and Its Versions
The C/C++ Compiler Package for the SuperH RISC engine Family
V.9.00 Release 00 or later

Note, however, that to install the device file updater V.1.11 on
your PC, you must install the V.9.03 Release 02 or later product of
the above compiler package in advance.
For details, see Note 1 "*" on the Web Page at:

https://www.renesas.com/dfu

The above URL is one of our global sites.

2. Descriptions of Revision
In Device File Updater V.1.11, the following CPUs have been added to
the CPUs supported by V.1.10:
- SH726A
- SH726B
- SH7734
- SH7752

You can check the list of CPUs that can be added by the device file
updater in "The Product Versions and the Added CPU Types" provided at
the following Web page:

https://www.renesas.com/dfu

This Web site will be updated on October 19.

The above URL is one of our global sites.

3. How to Obtain the Product

Download the installer of the device file updater V.1.11 for
the C/C++ compiler package for the SuperH RISC engine Family from:

https://www.renesas.com/dfu_download

Then install it. The installer will be published on the Web site on October 19.
