The Device File Updater Specific to the C/C++ Compiler Package for the SuperH RISC engine Family Revised to V.1.13

We have revised the device file updater specific to the C/C++ compiler Package for the SuperH RISC engine Family from V.1.12 to V.1.13.

For an overview of device file updaters, see:

<https://www.renesas.com/dfu>

The above URL is one of our global sites.

1. Compiler and Versions to Be Updated

The C/C++ Compiler Package for the SuperH RISC engine Family
V.9.00 Release 00 or later

Note, however, that to install the device file updater V.1.13 on your PC, you must install the V.9.03 Release 02 or later product of the above compiler package in advance.

For details, see Note 1 on the Web Page at:

<https://www.renesas.com/dfu>

The above URL is one of our global sites.

2. Descriptions of Revision

2.1 Added CPU

In the Device File Updater V.1.13, the following CPU has been added to the CPUs supported by V.1.12:

- SH72533

You can check the list of CPUs that can be added by the device file updater in "The Product Versions and the Added CPU Types" provided at the following Web page:

<https://www.renesas.com/dfu>

This Web site will be updated on September 5.

The above URL is one of our global sites.

2.2 Modified Sample File

The sample file created by selecting the following CPU has been modified:

- SH7239

3. How to Obtain the Product

Download the installer of the device file updater V.1.13 for the C/C++ compiler package for the SuperH RISC engine Family from:

https://www.renesas.com/dfu_download

Then install it. The installer will be published on the Web site on September 5.

The above URL is one of our global sites.
