

P9418

60W Wireless Power Receiver with WattShare™ TRx Mode

The P9418 is a highly-integrated single-chip wireless power transmitter/receiver IC (TRx). The device configures to transmit or receive an AC power signal through magnetic induction.

As a wireless power transmitter, the P9418 features an on-chip full/half-bridge inverter, a pulse-width modulation (PWM) generator, a modulator/demodulator for communication, and a microcontroller to produce an AC power signal to drive an external L-C tank. As a receiver, the device receives an AC power signal from a wireless transmitter and converts it to a rectified output voltage, which can power devices or supply the charger input in mobile applications. For optimized power delivery, the P9418 integrates a high-efficiency Synchronous Full Bridge Rectifier and control circuitry that modulates the load to send message packets to the Transmitter (Tx).

The P9418 features multiple-time programmable (MTP) non-volatile memory to easily update control firmware and device functions.

Also, the device includes over-temperature and voltage protection. Fault conditions associated with power transfer are managed by an industry-leading 32-bit ARM® Cortex®-M0 processor that offers a high level of programmability while consuming extremely low standby power. The processor also controls GPIOs to indicate operating and fault modes.

The P9418 is available in an ultra-small 70-WLCSP package.

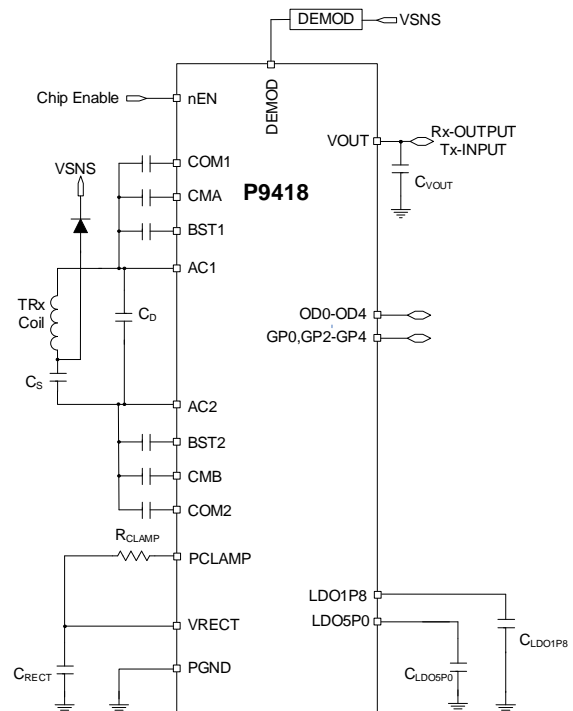

Applications

- Wireless power solution for mobile applications

Features

- Single-chip WPC medium power wireless solution
- 24kB Multiple-time programmable (MTP) non-volatile memory for expanded feature support
- WPC 1.2.4 compliant and WPC 1.3+ compatible
- Delivers up to 60W as a receiver
- WattShare™ TRx mode with up to 10W Tx capability
- Embedded 32-bit ARM® Cortex®-M0 processor
- Reliable overvoltage clamping
- Proprietary Rx-to-Tx modulation/demodulation for two-way communication
- High-performance LDO
- Tx-to-Rx (backchannel) communication
- Supports proprietary mode magnetic induction wireless power solutions
- Supports I²C 400kHz standard interface and GPIOs
- Package: 7 × 10-ball array, 2.82 × 4.22 × 0.50 mm, 70-WLCSP with 0.40mm ball pitch

Typical Application Diagram

IMPORTANT NOTICE AND DISCLAIMER

RENESAS ELECTRONICS CORPORATION AND ITS SUBSIDIARIES (“RENESAS”) PROVIDES TECHNICAL SPECIFICATIONS AND RELIABILITY DATA (INCLUDING DATASHEETS), DESIGN RESOURCES (INCLUDING REFERENCE DESIGNS), APPLICATION OR OTHER DESIGN ADVICE, WEB TOOLS, SAFETY INFORMATION, AND OTHER RESOURCES “AS IS” AND WITH ALL FAULTS, AND DISCLAIMS ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT OF THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.
