RENESAS

RZ/G Verified Linux Package for 64bit kernel Version 1.0.7-RT

Component list

Components listed below are installed to the rootfs which is used for booting target boards by building the Verified Linux Package according to the Release Note.

Each image name corresponds to the target name used when running bitbake commands such as "bitbake core-image-weston". Column "weston (Gecko)" corresponds to the building procedure for HTML5 described in the Release Note for HTML5.
