We would like to inform valued customers as follows.

We are planning discontinuance (End Of Life:EOL) step by step, especially about non Pb free products as we have informed in TN-SH7-A774A/E (Issued Jul.13,2010) .

This time, we would like to update the list with additional “ Non-promotion products” and complete EOL of the products which had not been produced already.

About the products which is indicated “ EOL” ,

We would stop the order entry and finish shipping out step by step.

We would finish the production completely by end of 2012.

About the products which is indicated “ Non-promotion products” ,

We would like to delete the product names on our Web site step by step,

but it does NOT means cease immediately their production.

-Note-

LIST of EOL products.

“No actual production” represents Non-promotion products and no actual production for several months.

“Continuous production” represents Non-promotion products but we would continue the production only for the customer who already use it.

“EOL” represents complete cease of production by “the END of 2012(fiscal. Year)”.
