

## A Note on Using the High-performance Embedded Workshop V.4.02.00 --With Moving Workspaces--

Please take note of the following problem in using the High-performance Embedded Workshop V.4.02.00:

- With moving workspaces

### 1. Description

If you move a workspace from the working directory to another and open the workspace, a blank dialog box (a Warning dialog box) may appear; if you close this dialog box, you will be unable to open the workspace. In such a case, usually the following message will be dispatched:

-----

Warning

This workspace has been moved.

Old directory: xxxxxxxxxx

New directory: xxxxxxxxxx

Do you want to continue opening this workspace?

Yes      No      Cancel

-----

### 2. Condition

This problem occurs if you use the High-performance Embedded Workshop V.4.02.00 on the secondary monitor of a multi-monitoring system.

### 3. Workarounds

This problem can be avoided in either of the following ways:

- (1) Use the High-performance Embedded Workshop V.4.02.00 on the primary monitor.

(2) If you want to use the High-performance Embedded Workshop V.4.02.00 on the secondary monitor, change the settings of the Options by going through the following steps before opening the workspace that has been moved:

- (a) Open the Setup menu and select the Options command to open the Options dialog box.
- (b) Click the Confirmation tab in the Options dialog box.
- (c) Uncheck the Open a moved workspace check box in the Options dialog box.
- (d) Click the OK button in the Options dialog box.

After changing the settings of the Options, you are able to open workspaces without displaying the Warning dialog box.

#### **4. Schedule of Fixing the Problem**

We plan to fix this problem in the next release of the product.
