A Note on Using High-performance Embedded Workshop V.4.04.00

Please take note of the problem described below in using High-performance Embedded Workshop V.4.04.00.

1. Problem

When your High-performance Embedded Workshop updated to V.4.04.00 is launched, it may be terminated abnormally.

2. Conditions

This problem occurs if the following conditions are both satisfied:

(1) The Find In Files facility* had ever been used in your High-performance Embedded Workshop before it was updated to V.4.04.00.

(2) The Directory pull-down list in the Find In Files dialog box contains 5 or 9 histories of specified directories.

*The Find In Files facility searches for the specified character string in the specified file. It can be accessed by opening the Edit menu of High-performance Embedded Workshop.

3. Workaround

Download the Hew_V40400 script file from the Web site (FAQ pages) shown below. Then copy the file to the directory where High-performance Embedded Workshop V.4.04.00 resides and execute it (double-click the file's icon).

Web site:FAQ 106852

4. Schedule of Fixing the Problem

We plan to fix this problem in the next release of the product.
