Nov. 16, 2017

Software for the PG-FP5 Flash Memory Programmer

Outline

We are revising the software for the PG-FP5 flash memory programmer.

For details of the PG-FP5 software, see the following URL:

<https://www.renesas.com/pg-fp5>

1. Software to Be Updated

The following software can be updated to the latest version.

Software to Be Updated	Latest Version
Firmware V2.15 and earlier versions	V2.16

For how to confirm the version you currently have, see the following URL:

https://www.renesas.com/pgfp5_ver

When updating your product to the above software, use V2.15 of the programming GUI and V4 of the FPGA data.

2. Description of Revision

- Support for the RX651 and RX65N groups

The software has been revised in response to the addition of the RX651 and RX65N groups to the support line.

3. Updating Your Product

Online updating is available free of charge.

Download the updating programs from the download page at the URL below.

The updating programs will be available from November 20.

https://www.renesas.com/pg_fp5_download

For details about the update, see chapter 3 of PG-FP5 User's Manual Common, at the following URL:

<https://www.renesas.com/search/keyword-search.html#genre=document&q=r20ut2922>

PG-FP5 V2.15 Flash Memory Programmer User's Manual Common

4. Remarks

We have announced the launch of the PG-FP6, a new flash memory programmer.

Details about the release are available via the following tool news. Please consider introducing the PG-FP6.

- [New release] The PG-FP6, a New Flash Memory Programmer

- Further Enhancement of High-Performance, Security, and Functions for Production Lines -

<https://www.renesas.com/search/keyword-search.html#genre=document&q=r20ts0202>

The PG-FP5 is to be discontinued, with final orders being accepted until May 2018.

MCUs for the PG-FP5 will be made available until September 2018.
