

General Description

The HXT42100 is a single channel, low power, Direct Modulated Laser (DML) driver for LR4 parallel optical applications that supports data rates up to 28Gbps and optical reach up to 10km. In conjunction with a DFB laser diode an individual DFB laser diode, the device handles the complete digital-to-optical conversion, including CML input with equalization, laser driver, drive control, and supervision.

Designed for direct DC-coupled die in TOSA applications with a small number of additional components for cost-effective and compact assemblies. Available in die form.

Applications

- Up to 10km LR 100G-BASE Ethernet modules for datacenters
- Up to 2km CLR 100G-BASE Ethernet modules for datacenters
- 32G Fiber Channel modules to 10km
- InfiniBand EDR optical modules
- Proprietary single channel optical modules
