Rail	Voltage	Power Supply Rails
Rail 1	0.85/0.9V	VCCINT, VCCINT_VCU, VCCBRAM, VCCINT_IO, VCC_PSINTLP, VCC_PSINTFP, VCC_PSINTFP_DDR
Rail 2*	1.8V*	VCCAUX, VCCAUX_IO, VCCADC, VCC_PSAUX, VCC_PSDDR_PLL, VCC_PSADC
Rail 3*	1.2V*	VMGTAVTT(GTH), VMGTAVTT(GTY), VCC_PSPLL
Rail 4	1-1.5V	VCCO_PSDDR, DDR_VDD2, DDR_VDDQ
Rail 5	1.8-3.3V	VCCO_PSI0
Rail 6*	0.85/0.9V	VPS_MGTRAVCC
Rail 7*	1.8V*	VMGTAVCCAUX(GTH), VMGTAVCCAUX(GTY), VPS_MGTRAVTT
Rail 8*	0.9V*	VMGTAVCC(GTH), VMGTAVCC(GTY)
Rail 9	1.2-3.3V	HDIO VCCO
Rail 10	1.0-1.8V	HPIO VCCO

ISL8225M SINGLE OUTPUT (40A)

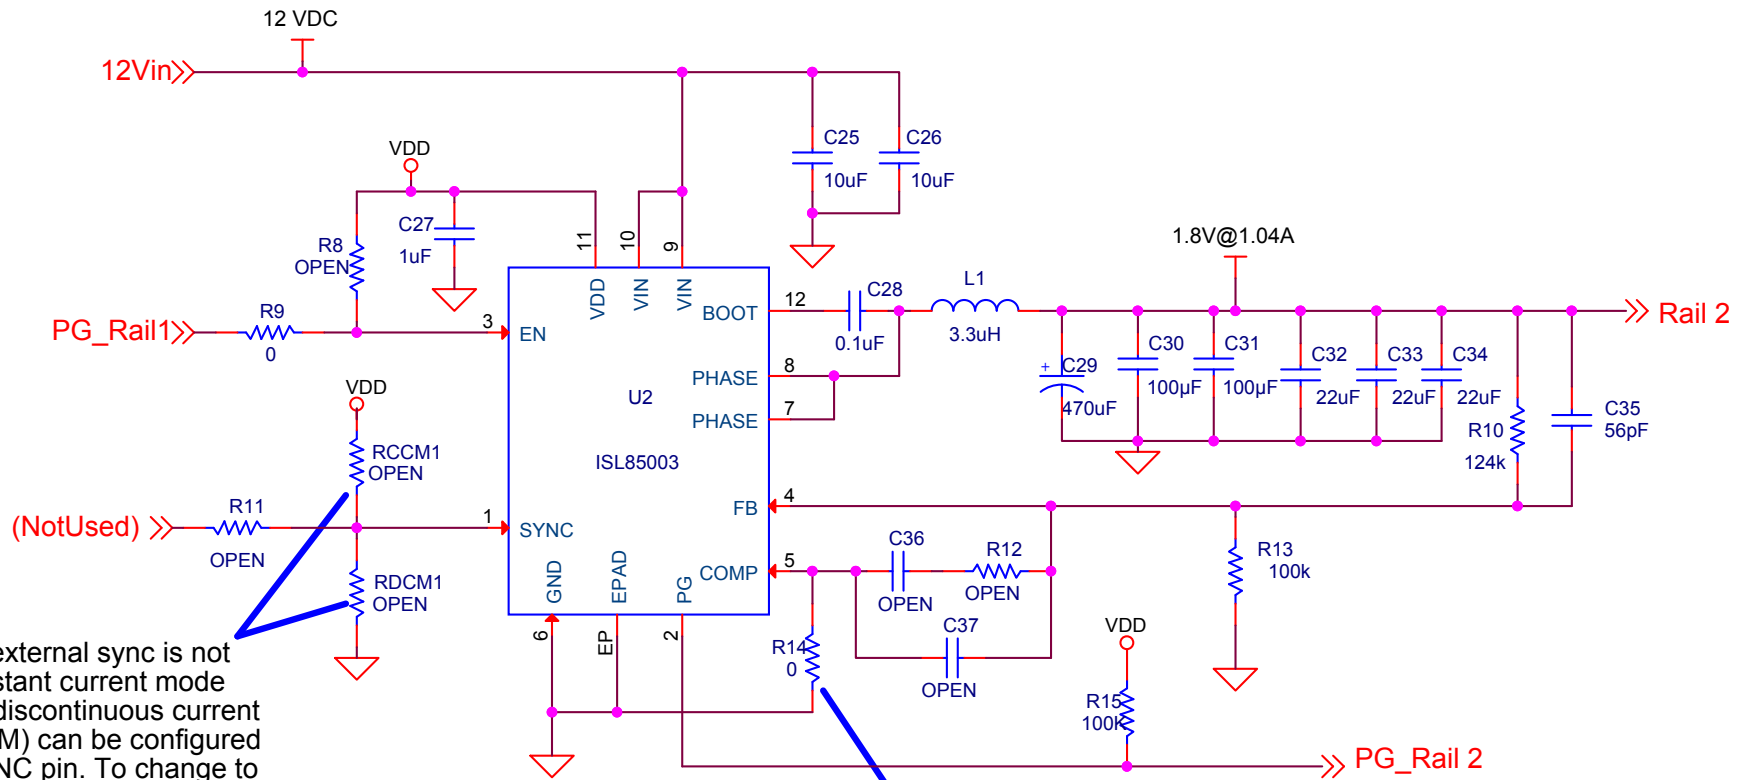

VIN RANGE:
4.5V to 20V

Please refer to the ISL8225M datasheet for information about temperature or output current derating as influenced by the operating frequency.

ISL85003 SINGLE OUTPUT (3A)

When an external sync is not used, constant current mode (CCM) or discontinuous current mode (DCM) can be configured on the SYNC pin. To change to DCM mode, remove RCCM, and change RDCM to 0 ohms.

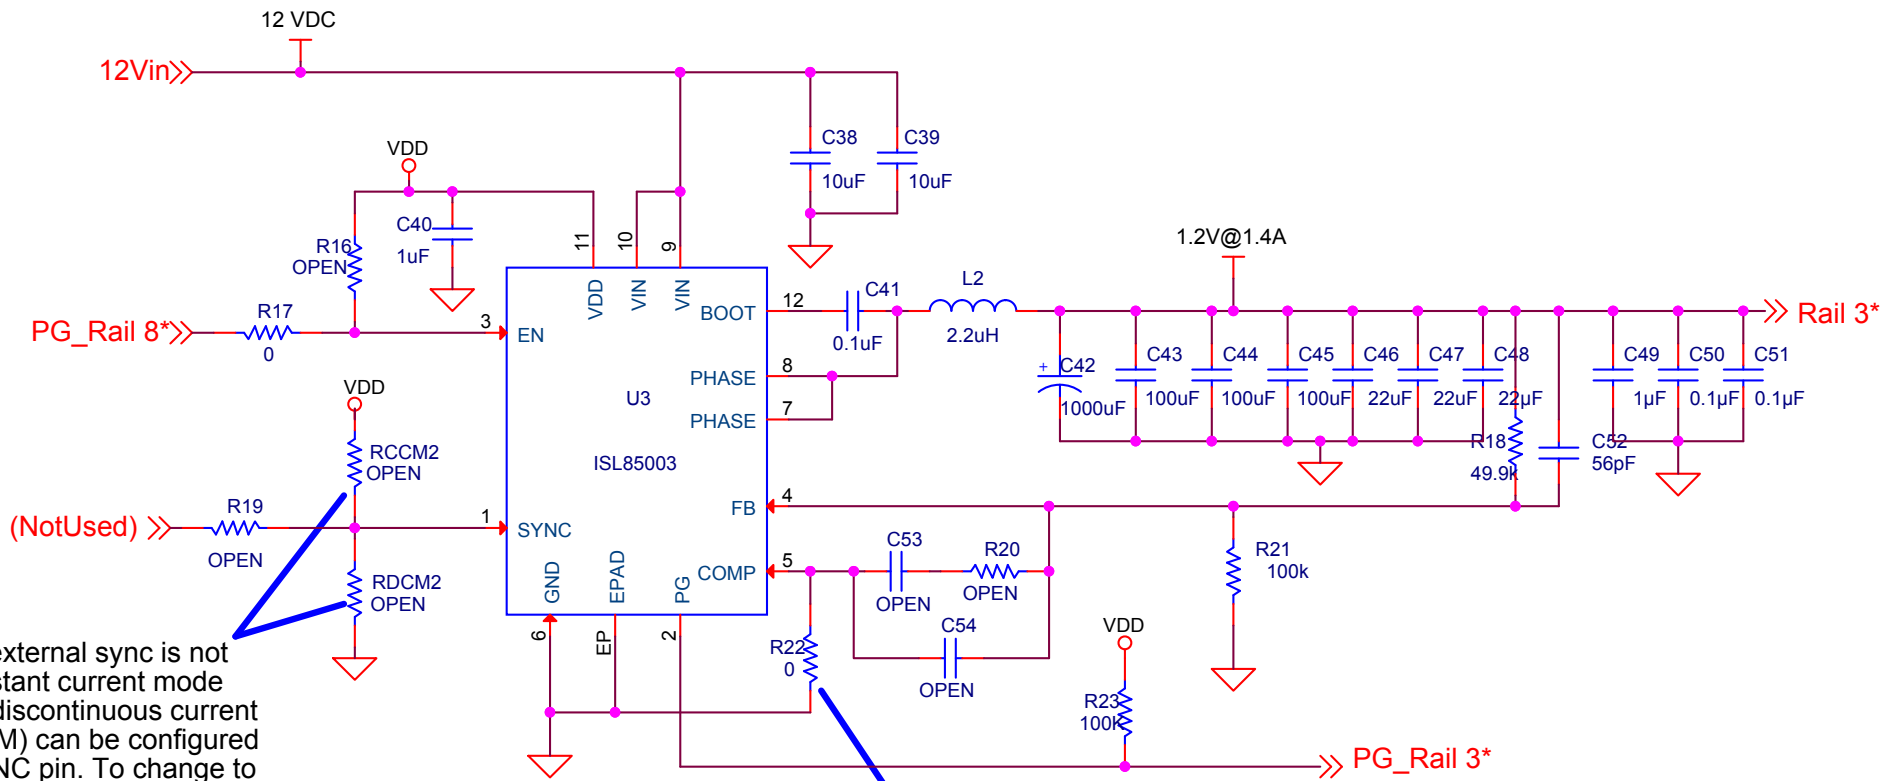

If custom compensation is desired, remove the ground connection on the COMP pin to enable external compensation.

OPEN value components on the COMP pin are place holders if external compensation is used.

Programmable Soft Start is available in the ISL85003A (without synchronization)
