Certificate of Compliance - RoHS Compliance Declaration

The European Union (EU) Directive 2002/95/EC issued on January 27th, 2003 applies to the restriction of the use of certain hazardous substances (RoHS) in electrical and electronic equipment. The EU has subsequently reviewed and recast the directive as RoHS Directive 2011/65/EU (RoHS 2) on June 8th, 2011. RoHS 2 will repeal and replace the original RoHS Directive on January 3, 2013.

This declaration is to certify that all IDT Standard Parts meet the requirements of the RoHS Directive 2002/95/EC and the revised and recast RoHS Directive 2011/65/EU which includes use of exemptions listed in the Annex as shown below:

Exemption 7(b): Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signaling, transmission as well as network management for telecommunications.

As shown in Appendix A and pursuant to Article 4 of the RoHS directive, IDT Standard Parts do not contain the restricted materials above their respective limits. Also, this declaration shall confirm that IDT's Standard Parts comply with the additional package material limits of RoHS 2 and other industry related substance restrictions.

This information concerning the substances contained in products is based on information provided by third parties. IDT does not routinely conduct destructive testing or chemical analysis of incoming material, and does not warranty and guarantee the accuracy of the information.
