

RZ Ecosystem Partner Solution

TES Guiliani GUI Framework

Solution Summary

Guiliani is a modern and powerful C++ software for creating stylish Graphical User Interfaces (GUI) on a wide range of embedded hardware such as the [RZ/A family](#). It has a special strength in supporting teamwork, therefore helping to keep GUI projects on budget and on time.

Features/Benefits

- Graphics Assets Streaming: Enables agile development, skins/themes and more...
- Powerful WYSWYG Editor: Intuitive and user-friendly, even artists can use it easily.
- Scalable: Supports from bare-metal to Linux; and from MCU to MPU.
- Well Supported: Highest customer satisfaction ratings.
- Flexible Business Model: To match your business situation.

Target Markets and Applications

- ALL embedded applications such as:
 - Appliances
 - Medical & Fitness
 - Industrial
 - Telecoms
 - Industrial
 - Wearable
 - Automotive & Transportation
 - Test & Measurement

- **TES is a Technology and Design Services Company** based in Germany with a global customer base.
- **90 employees, 90% engineers**
- **Embedded software, Graphics, RF such as radar and chip design including mixed signal, FPGA**
- **We Create – Design – Manufacture**
- **Close Renesas Electronics Partner** for 20 years, in all imaginable applications...
