CAUTIONARY STATEMENTS:

The statements in this presentation with respect to the plans, strategies and forecasts of NEC Electronics and its consolidated subsidiaries (collectively “we”) are forward-looking statements involving risks and uncertainties. We caution you in advance that actual results could differ materially from such forward-looking statements due to several factors. The important factors that could cause actual results to differ materially from such statements include, but are not limited to, general economic conditions in our markets, which are primarily Japan, North America, Asia and Europe; demand for, and competitive pricing pressure on, our products and services in the marketplace; our ability to continue to win acceptance of its products and services in these highly competitive markets; and movements in currency exchange rates, particularly the rate between the yen and the U.S. dollar. Among other factors, a worsening of the world economy; a worsening of financial conditions in the world markets, and a deterioration in the domestic and overseas stock markets, would cause actual results to differ from the projected results forecast.

Changes in Q4-Q1 Sales by Platform

Reasons for changes in Q4-Q1 Sales

**SoC Platform**
- A decline in sales of digital baseband LSIs due to production adjustments for mobile handsets in the Japanese market
- A decline in sales of memories for mobile handsets
- A decline in sales of LSIs for DVD drives

**MCU Platform**
- A recovery in the general-purpose MCU market especially in Asia and Europe
- A decrease in production for Auto MCUs in the Japanese market due to seasonality factors

**Components**
- An increase in sales of LCD drivers for small panels due to market share expansion
- A recovery in the discrete market
- A decline in sales of driver ICs for PDP panels

Reasons for changes in Q4-Q1 Sales

- Sales of digital baseband LSIs for mobile handsets decreased due to production adjustments
- Sales of LCD drivers ICs for mobile handsets increased due to an increase in market share
- Sales of LSIs for DVD drives declined
- Sales of LCD driver ICs for large panel decreased due to inventory adjustments
- Sales of driver ICs for PDP panels decreased
- Sales for automotive area declined in the Japanese market due to seasonality factors
- Sales of MCUs increased, including the All Flash microcontrollers
- A recovery in the discrete market contributed to an increase in sales

(+/- Factors)

**SoC Platform**
(+): Launching shipments of LSIs for a new game console, with a ramp-up in capacity for 300mm line in Yamagata
(+): Expanding sales of LSIs for printers due to seasonality factors
(-): Adjustments in digital baseband LSIs for mobile handsets continue

**MCU Platform**
(+): Expanding sales for Auto due to seasonality factors
(+): An upward momentum in the general-purpose MCU market continues

**Components**
(+): An upward momentum in the discrete market continues
(-): Adjustments for LCD driver ICs for large panels continue
Order Trends (9 quarterly periods)

An upward trend, especially in MCUs and discrete; however, adjustments may occur in consumer electronic and PC related areas in 2H FY07/3
