Rev.1.00

e² studio Integrated Development Environment V6.3.0

May 16, 2018

Outline

We will be revising the e² studio integrated development environment from V6.2.0 to V6.3.0.

Refer to the URL below for an overview of the product.

<https://www.renesas.com/e2studio>

1. Products and Versions to Be Updated

➤ e² studio V6.2.0

Check the version number of your copy of e² studio in the dialog box opened by selecting [About e2 studio] from the [Help] menu of e² studio.

2. Items Revised

2.1 Description of Modification

The following items^(Note) have been modified.

[IDE-18640] An RX device does not accept the device ID from the e² studio when connected to the e² studio for debugging.

[IDE-20010] Variables are not initialized (projects for the GCC ARM Embedded toolchain).

Note: For details, see the description for the applicable item number in the following document.

e² studio V6.2.0 Release Note – Open Issues:

https://www2.renesas.eu/_custom/software/ree_eclipse/e2studio6/docs/releasenotes/6.2.0/openissues.htm

2.2 Improvements to Functionality

For other improvements, see the “What is new in 6.3.0?” release note (scheduled to be released on May 21).

3. Updating Your Product

Download the e² studio installer from the URL below.
V6.3.0 will be available from May 21.

https://www.renesas.com/e2studio_download

Note 1: You cannot update e² studio from V5.4.0 or an earlier version to V6.0.0 or a later version (including V6.3.0) by overwriting the installation. Create another folder and newly install e² studio.

Note 2: There are two installers: one for online use (Web installer), and one for offline use.

The online installer for V6.2 (setup_e2_studio_6_2_web.exe) can be applied. However, note that V6.3.0 can be installed on/after the release date of V6.3.0.

Use the installer for offline use in environments which are not connected to the Internet.

Refer to the download page indicated above for details. If you need V6.0.0, V6.1.0, or V6.2.0, use the offline installer for those versions.

Note 3: Do not use a newly installed version of e² studio to open a workspace that was used by a different version of e² studio. Specify a newly created folder as a workspace and import projects from the previous workspace.
