

PLL Datasheet

Analog-PLL For Skew adjust

Key Features

- Including Loop-filter
- VCO operating range : 720MHz - 1680 MHz
- Output frequency range : 45MHz – 1680 MHz
- Input frequency range : 22.528MHz - 420MHz
- Multiplying (Output freq. / PFD freq.) : 16
- Divider
4bit feedback divider, 2bit input divider and 4bit output divider
- Power-down Mode
- SSC input is not available
- Power-on sequence is constraint-free
- STBY sequence is constraint-free

TECHNOLOGY

Process: TSMC 28nm HPM/HPC

Available metallization technologies : 4X2Y2R

OPERATING CONDITION

Parameter		Min	Max	Unit
Operating Voltage (AVDD)		1.62	1.98	V
Operating Voltage (VDD)		0.935	1.08	V
Junction Temperature		-40	125	°C
Input Clock	Duty	30	70	%
	Rise/Fall time	-	0.2	ns
