Based on Renesas Culture, we aim for continuous growth and enhancement of corporate value over the mid- to long-term. In addition, we aim to co-exist and co-prosper with every stakeholder in order to create long-term sustainable value as a responsible global company. We will continue to solidify our business foundation as a global semiconductor company by honing technological advancement as well as supplying excellent semiconductor products and optimized solutions through elaborate marketing and sales activities. We recognize the importance to build a corporate governance structure and system that enables transparent, fair, quick and resolute decision-making. We will continue to enhance our corporate governance structure and system through various measures such as communication and cooperation with our stakeholders including shareholders, appropriate information disclosure, ensuring appropriate

【Our Purpose】

To Make Our Lives Easier

At Renesas we continuously strive to drive innovation with a comprehensive portfolio of microcontrollers, analog and power devices. Our mission is to develop a safer, healthier, greener, and smarter world by providing intelligence to our four focus growth segments: Automotive, Industrial, Infrastructure, and IoT that are all vital to our daily lives, meaning our products and solutions are embedded everywhere.

【Renesas Culture】

<Transparent>

The leadership team's strategy and policy, the company's current situation, as well as the issues and thoughts of each business organization should be well understood among employees. This is also tightly connected to the "Agile" and "Entrepreneurial" elements described below, and we believe it is fundamental for the success of every individual and organization.

<Agile>

In order to respond to changes in a timely manner, it is necessary to identify the likely outcomes and implications as quickly as possible, make decisions quickly, and rapidly take or correct actions. We must recognize situations, make decisions and act at a high velocity. When a follow-up regarding a task is made from inside and outside the company, employees should understand they are not being "Agile".

<Global>

Not only the markets that we operate in, but also our customers and our competitors are global, and in order to thrive in this global environment, it is essential for us to have a global perspective ourselves. It is true we need better language skills, but there are many other simple steps we can take to facilitate communication, such as organizing discussion agenda, issues, alternative solutions in advance. In particular, numbers are useful as words. Whenever possible, use numbers to communicate, and try to share information more smoothly.

<Innovative>

In order for Renesas to provide "Innovative" technologies and products and continue to create sustainable social value, it is essential to practice "Innovative" way of conducting business and of thinking. Each and every one of our employees should embody "Innovation" using their imagination and creativity to contribute to the realization of a richer society.

<Entrepreneurial>

Individual employees should act professionally, voluntarily, and independently as if they are "running their own business" and are responsible for the results they deliver. Based on our strategies and policies as a company, we aim to develop employees who can think freely and create new value, without being constrained by existing concepts.
