To our customers,

---

**Old Company Name in Catalogs and Other Documents**

On April 1\(^{st}\), 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation ([http://www.renesas.com](http://www.renesas.com))

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.

2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.

3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.

4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.

5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.

6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.

7. Renesas Electronics products are classified according to the following three quality grades: “Standard”, “High Quality”, and “Specific”. The recommended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as “Specific” without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as “Specific” or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is “Standard” unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

    “Standard”: Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.

    “High Quality”: Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.

    “Specific”: Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.

8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.

9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.

10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.

11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.

12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.
Updating the USB Adapter Firmware

Thank you for using our product. Please read the notes listed below before use of the E6000H emulator with the USB adapter.

1. Overview
We have updated the USB adapter firmware in order to improve the performance of the E6000H emulator with the USB adapter connected. Before using the USB adapter, follow the procedure below to update your USB adapter firmware.

2. Procedure to Update the USB Adapter Firmware
The following steps are required for update of the USB adapter firmware.

2.1 Connecting the USB Adapter
Ensure that the USB adapter is connected to the host computer.

2.2 Checking the Version Numbers of the USB Adapter Firmware
To check the version numbers of the USB adapter firmware, execute "Usbwrite.exe" in the installation disk by double-clicking the file.
Note: "Usbwrite.exe" can be found on the following location:
"<drive>:\DRIVERS\USB\Usbwrite.exe" (<drive> is a name of the CD-ROM drive.)
Figure 2.1 Checking the Version Numbers of the USB Adapter Firmware

No further steps are necessary when the shown version numbers (figure 2.1) are as follows.

- USBINI.SYS V1.0.00.000
- USBSUB.SYS V2.1.00.000
- USBSYS.SYS V2.1.00.000

If different, go on to section 2.3, Updating the USB Adapter Firmware.
2.3 Updating the USB Adapter Firmware

The latest USB adapter firmware has been downloaded as a self-compressed file. Double-click this file to expand it in the directory you like. With this expansion, a folder "USBADPTERFIRM" will be created. Find the three files in the "USBADPTERFIRM" folder ("USBINI.SYS", "USBSUB.SYS", and "USBSYS.SYS"), then drag and drop them onto "Usbwrite.exe" (figure 2.2).

![Select these three files, then drag and drop them.](image)

**Figure 2.2 Drag and Drop of Three Files**

This shows three groups of the version numbers: those of the USB adapter firmware dragged and dropped (Input download file), those of the USB adapter firmware currently installed in the USB adapter (Before), and those of the new USB adapter firmware to be installed after the update of the USB adapter firmware (After) (figure 2.3).
Figure 2.3   Showing Version Numbers of the USB Adapter Firmware

USBSUB.SYS V2.1.00.000
USBINI.SYS  V1.0.00.000
USBSYS.SYS  V2.1.00.000

After checking that the version numbers are the same as above, select "Y" to modify the USB adapter firmware or "N" to reject the modification.

If you have selected "Y", press the return key to exit the program after writing of the USB adapter firmware is completed (figure 2.4). Selecting "N" terminates the program immediately. Once you have selected "Y", do not remove the USB cable or terminate the program until writing of the USB adapter firmware is completed (figure 2.4). Otherwise, the USB adapter will not operate correctly.
2.4 Re-connecting the USB Adapter

Disconnect the USB adapter from the host computer. After checking the disconnection, re-connect the USB adapter to the host computer.

Update of the USB adapter firmware is now completed.
3. Support Information of the E6000H Emulator

Support information regarding the E6000H emulator, including the latest version of the HEW for E6000H, is available on our website. Please access the following URL: http://www.renesas.com/
