ISL8106EVAL1Z

Evaluation Board

AN1452
Rev 0.00
Feb 16, 2009

The ISL8106EVAL1Z evaluation board demonstrates the performances of the ISL8106, synchronous buck PWM controller with Intersil's Robust Ripple Regulator (R3) technology.

The ISL8106 features a 1.5ms digital soft-start and can be started into a pre-biased output voltage. The PWM switching frequency can be programmed from 200kHz to 600kHz. The ISL8106 can be configured to operate in Forced-Continuous-Conduction-Mode (FCCM) or in Diode-Emulation-Mode (DEM), which improves light-load efficiency. An audio filter prevents the PWM switching frequency from entering the audible spectrum due to extremely light load while in DEM. Refer to the ISL8106 data sheet for a more detailed operation by clicking on the following link.

ISL8106EVAL1Z Reference Design

The ISL8106EVAL1Z design criteria is listed in Table 1.

TABLE 1. ISL8106EVAL1Z DESIGN CRITERIA

PARAMETERS	VALUE
Input Voltage	7V to 25V
Output Voltage	1.8V
Rated Output Current	25A
Switching Frequency	300kHz

Setting Switching Frequency

The switching frequency of ISL8106EVAL1Z can be adjusted through the resistor, R_5, that is connected from the FSET pin to the GND pin. Programming the approximate PWM switching frequency can be estimated from Equation 1:

$$R_{FSET} = \frac{1}{60 \cdot F_{OSC} \cdot [1 \times 10^{-12}]} \quad \text{(EQ. 1)}$$

Setting Overcurrent Protection Threshold

An overcurrent protection fault will occur when the ISEN pin has measured more than the OCP threshold current I_{OC} (26µA, typ.), on consecutive PWM pulses, for a period exceeding 20µs. It does not matter how many PWM pulses are measured during the 20µs period. If a measurement falls below I_{OC} before 20µs has elapsed, then the timer is reset to zero. A short circuit protection fault will occur when the ISEN pin has measured more than the short-circuit threshold current $I_{SC,}$ in less than 10µs, on consecutive PWM pulses.

The value of RSEN can then be calculated by Equation 2:

$$R_{SEN} = \frac{\left[I_{FL} + \frac{I_{P-P}}{2}\right] \cdot OC_{SP} \cdot r_{DS(ON)}}{I_{OC}} \quad \text{(EQ. 2)}$$

Where:

- R_{SEN} (Ω) is the resistor used to program the overcurrent setpoint
- I_{OC} is the I_{SEN} threshold current value sourced from the ISEN pin that will activate the OCP circuit
- I_{FL} is the maximum continuous DC load current
- I_{P-P} is the inductor peak-to-peak ripple current
- OC_{SP} is the desired overcurrent setpoint expressed as a multiplier relative to I_{FL}

Power and Load Connections

INPUT VOLTAGE

The PVIN post (J1) is connected to the drain of the upper MOSFET and the VIN pin of the IC. The post (J2) is connected to PGND.

OUTPUT VOLTAGE LOADING AND MONITORING

Connect the positive and negative leads of an electronic load to J3 and J4 respectively. Terminal TP4 (PGND) and TP5 (V_{OUT}) can be used to measure the output voltage.

Switch Descriptions

TABLE 2. ISL8106EVAL1Z SWITCH DESCRIPTIONS

TOGGLE SWITCHES	FUNCTION
SW1	OFF: Shorts the EN pin to GND (Disable the controller) ON: Enable the controller, EN pin is pulled to V_{IN} and clamped by D1.
SW2	DEM: FCCM pin is pulled to GND to enable diode-emulation mode FCCM: FCCM pin is pulled to VCC to inhibits diode-emulation mode

Test-point Descriptions

Notice

1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system. Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information.
2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application examples.
3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
5. Renesas Electronics products are classified according to the following two quality grades: “Standard” and “High Quality”. The intended applications for each Renesas Electronics product depends on the product’s quality grade, as indicated below.

   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc.

   Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user’s manual or other Renesas Electronics document.
6. When using Renesas Electronics products, refer to the latest product information (data sheets, user’s manuals, application notes, “General Notes for Handling and Using Semiconductor Devices” in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified ranges.
7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
8. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or transactions.
10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products.

(Note 1) “Renesas Electronics” as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries.

(Note 2) “Renesas Electronics product(s)” means any product developed or manufactured by or for Renesas Electronics.
