

New Style of Height Meter

memori

Don't want your house interior be cluttered by kid's toys? Based on this type of concern from mothers with children, we propose a simple design height meter that doesn't detract from the house interior. By using this, children's growth can be measured without drawing on the wall, and their growth can be seen by displaying the historical measurement.

Press "Measure"

Press "Record"

Place your hand over children's head and touch Memori.

Height will be displayed.
