### Specifications

#### Wafer process site addition

Existing site: Renesas Semiconductor Manufacturing Kawashiri, Saijo

Additional site: Renesas Semiconductor Manufacturing Naka

#### 4M changing points (Wafer process site addition)

As shown in the following table, the check to 4M change was performed. The quality influence by these changes was verified and confirmed that there is no difference between Naka factory and Kawashiri factory.

Item	Check Result	Judgement
Machine	In this development, Naka uses the equipment of factory (12 in). However, Naka uses the same level of equipment as Kawashiri (8 in), so there is no problem in manufacturing the product.	No risk
Method	The process is transferred from Kawashiri and the same flow as Kawashiri.	No risk
Man	Adopt operator certification system. Only certificated operator can work for the production.	No risk
Material	There is no change in the material. A 12-inch wafer with the same specifications as the one used at the Kawashiri Factory is used.	No risk
