## **PRODUCT/PROCESS CHANGE NOTICE (PCN)**

### **ATTACHMENT 1 - PCN #: TB0901-06**

**PCN Type:** Product Top Mark

**Data Sheet Change:** None

No change in moisture sensitivity level (MSL)

#### **Detail Of Change:**

This notification is to advise our customers that IDT will introduce LASER TOP MARK as a replacement to INK TOP MARK for FCBGA/SBGA packages with metal lid and for PQFP/TQFP packages with exposed heat spreader on topside. The laser top marking is currently being used on other plastic package families.

Refer to Page 3 for samples showing the package with metal lid and heat spreader marked in Ink and Laser. Please note that these are some examples only and should not be considered as representing all possible variations due to difference in lead counts of each package family.

Customers may expect to receive shipments in laser top marked no sooner than 90 days from the date of this PCN notification. Shipments to customers may contain either ink or laser top marked materials only during the transition period or until the ink mark inventory has been depleted. There will be no mixing of ink and laser top mark materials in one single shipment.
