PRODUCT/PROCESS CHANGE NOTICE (PCN)

ATTACHMENT I - PCN # : TB1407-02

PCN Type: Manufacturing Site - Alternate Test & Backend Location

Data Sheet Change: None

Detail Of Change:

This notification is to advise our customers that IDT is adding ASEK, Taiwan as an alternate facility for Test process for the selective products that are presently tested at IDT Penang, Malaysia facility. Products tested in ASEK will also complete the Backend process in this same facility.

This change will allow IDT the flexibility to ship from either facility and will provide the increased capacity, flexibility and shorter lead time to meet market demand.

The test correlation plan will ensure that the testing is fully compatible and transferable between the test sites with no change to the test coverage, test configuration or test flow. The Backend process is standardized between the 2 sites. There will be no change to the Backend process without further notification to customers. Upon successful completion of the test correlation plan, products tested at ASEK will be available to ship.

There is no change in the moisture sensitivity level (MSL).

If you require samples to conduct evaluations, please contact your local sales representative to acknowledge this PCN and request samples.
