# **PRODUCT CHANGE NOTICE**

**Alternate Manufacturing Site  
for Assembly of the Listed  
Intersil QSOP and SC-70  
Packaged Products**

**Refer to:  
PCN12091**

**Date: December 4, 2012**

December 4, 2012

To: Our Valued Intersil Customer

Subject: **Alternate Manufacturing Site for Assembly of the Listed Intersil QSOP and SC-70 Packaged Products – Carsem, Ipoh Malaysia (CAM)**

This notice is to inform you that Intersil will begin using the Carsem M-site (CAM) facility in Ipoh Malaysia as an alternate site for assembly of the listed QSOP (Quarter Small Outline Package) and SC-70 (Small Outline Transistor) packaged products. This action will expand current capabilities and capacities to optimize Intersil's ability to meet customer's delivery requirements. The product and site-specific qualification activities are in progress and expected to complete during Q1 CY2013.

The Carsem (CAM) facility is ISO 9001:2008, TS 16949:2009, and ISO 14001:2004 certified. The CAM facility is qualified as a supplier to Intersil for performing assembly of packaged products, including the QSOP and SC-70 package styles. There will be no change in the die attach, bond wire (material or diameter), frame material, or moisture sensitivity level (MSL). The 16I QSOP, 24I QSOP, and select 6I SC-70 packaged devices will require minor dimension changes to the package outline drawings (POD). The affected PODs and a summary containing a list of products along with the current and new PODs are included for reference. The material set combinations for assembly and other key items are as follows:

Key Items	Unisem - Current		Carsem M - New (Alternate)	
	QSOP	SC - 70	QSOP	SC - 70
Mold Compound	SG600	SG600	SG600	CEL9220HF13
Die Attach	A8290	84-1LIMSR4 or A8006NS	A8290	84-1LIMSR4 or A8006NS
Bond Wire - Gold (Au)	1.0 or 2.0 mil	1.0 mil	1.0 or 2.0 mil	1.0 mil
Moisture Sensitivity Level	2 or 3	1, 2, or 3	2 or 3	1, 2, or 3
Frame Material	C194	C194	C194	C194
Device Marking - Site Code	B	B	G	G

The assembly qualification plan is designed using JEDEC and other applicable industry standards to confirm there is no impact to form, fit, function, or interchangeability of the product. A summary of the qualification plan is included for reference. The qualification results will be available for review upon completion by request. The remainder of the manufacturing operations (wafer fabrication, package level electrical testing, shipment, etc.) will continue to be processed to previously established conditions and systems.

Product affected by this change is identifiable via Intersil's internal traceability system. In addition, product assembled at CAM may also be identified by the assembly site code (country of assembly) when marked on the devices. The site code for product assembled at CAM with gold bond wire is "G".

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products being supplied. Customers may expect to receive product assembled at either the current or the newly qualified sites beginning *ninety* days from the date of this notification or earlier with approval.

If you have concerns with this change notice, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jon Brewster  
Intersil Corporation

NOTES:

1. Symbols are defined in the "MO Series Symbol List" in Section 2.2 of Publication Number 95.
2. Dimensioning and tolerancing per ANSI Y14.5M-1994.
3. Package length does not include mold flash, protrusions or gate burrs. Mold flash, protrusion and gate burrs shall not exceed 0.15mm (0.006 inch) per side.
4. Package width does not include interlead flash or protrusions. Interlead flash and protrusions shall not exceed 0.25mm (0.010 inch) per side.
5. The chamfer on the body is optional. If it is not present, a visual index feature must be located within the crosshatched area.
6. Terminal numbers are shown for reference only.
7. Lead width does not include dambar protrusion. Allowable dambar protrusion shall be 0.10mm (0.004 inch) total in excess of "B" dimension at maximum material condition.
8. Controlling dimension: MILLIMETER.

Quarter Size Outline Plastic Packages (QSOP)

**NOTES:**

1. Symbols are defined in the "MO Series Symbol List" in Section 2.2 of Publication Number 95.
2. Dimensioning and tolerancing per ANSI Y14.5M-1982.
3. Dimension "D" does not include mold flash, protrusions or gate burrs. Mold flash, protrusion and gate burrs shall not exceed 0.15mm (0.006 inch) per side.
4. Dimension "E" does not include interlead flash or protrusions. Interlead flash and protrusions shall not exceed 0.25mm (0.010 inch) per side.
5. The chamfer on the body is optional. If it is not present, a visual index feature must be located within the crosshatched area.
6. "L" is the length of terminal for soldering to a substrate.
7. "N" is the number of terminal positions.
8. Terminal numbers are shown for reference only.
9. Dimension "B" does not include dambar protrusion. Allowable dambar protrusion shall be 0.10mm (0.004 inch) total in excess of "B" dimension at maximum material condition.
10. Controlling dimension: INCHES. Converted millimeter dimensions are not necessarily exact.

$\alpha$	0°	8°	0°	8°	-

Rev. 0 7/05

#### NOTES:

1. Dimensioning and tolerance per ASME Y14.5M-1994.
2. Package conforms to EIAJ SC70 and JEDEC MO203AB.
3. Dimensions D and E1 are exclusive of mold flash, protrusions, or gate burrs.
4. Footlength L measured at reference to gauge plane.
5. "N" is the number of terminal positions.
6. These Dimensions apply to the flat section of the lead between 0.08mm and 0.15mm from the lead tip.
7. Controlling dimension: MILLIMETER. Converted inch dimensions are for reference only
