
PRODUCT CHANGE NOTICE

**Alternate Bond Wire Material
and Manufacturing Facilities
for Assembly of the Listed
Intersil DFN/QFN Packaged
Products**

**Refer to:
PCN13025B**

Date: October 25, 2013

October 25, 2013

To: Our Valued Intersil Customer

Subject: **Alternate Bond Wire Material and Manufacturing Facilities for Assembly of the Listed Intersil DFN/QFN Packaged Products – Advanced Semiconductor Engineering (ASECL) - Chung-Li, Taiwan and STATS ChipPAC (SCM) - Kuala Lumpur, Malaysia**

PCN13025B is being issued to inform customers that Intersil has updated the list of affected products contained in notice PCN13025 that was issued on March 13, 2013. The products listed in the table below have been removed from the notice. As such, the changes outlined in PCN13025 will not be implemented for those products. The content of the original notice, PCN13025 and PCN13025A, with the updated product list is included for reference.

Products removed from PCN13025:

This notice is to inform you that Intersil is qualifying assembly using copper bond wire material at the Advanced Semiconductor Engineering (ASECL) and STATS ChipPAC (SCM) facilities for the listed DFN/QFN (Dual/Quad Flat No-Lead) packaged products. The copper bond wire is an alternate to the gold bond wire currently used for assembly of the listed products. This action will expand current capabilities and capacities to optimize Intersil's ability to meet customer's delivery requirements. As of the date of this notice, the product and site-specific qualification activities at the SCM & ASECL facilities are complete.

The Advanced Semiconductor Engineering (ASECL) and STATS ChipPAC (SCM) facilities are ISO 9001:2008 and ISO/TS 16949:2009 certified. ASECL and SCM are qualified as primary suppliers to Intersil for high volume assembly of DFN/QFN packaged products with both copper and gold bond wire material. Products assembled with copper bond wire are classified as moisture sensitivity level three (MSL 3 at 260 °C per J-STD-020). As such, the listed products will be packed, labeled, and shipped as moisture sensitivity level three (MSL 3) upon implementation of the changes outlined in this PCN. Intersil intends to utilize the current sources of supply, ASECL, or SCM interchangeably for un-interrupted manufacturing of the listed products without additional notice to customers.

The assembly qualification plan is designed using JEDEC and other applicable industry standards to confirm there is no impact to form, fit, function, or interchangeability of the product. A summary of the qualification plan and results to date is included for reference. The qualification results will be available for review upon completion by request. The remainder of the manufacturing operations (wafer fabrication, package level electrical testing, etc.) will continue to be processed to previously established conditions and systems.

Product affected by this change is identifiable via Intersil's internal traceability system. In addition, product assembled at ASECL or SCM may also be identified by the assembly site code (country of assembly) when marked on the devices. The site code for product assembled at ASECL with copper bond wire is "W". The site code for product assembled at SCM with copper bond wire is "M".

Intersil will take all necessary actions to conform to agreed upon customer requirements and to ensure the continued high quality and reliability of Intersil products being supplied. Customers may expect to receive product assembled using gold bond wire from the current facilities or copper bond wire from the SCM and/or ASECL facilities beginning ninety days from the date of the original notice, March 13, 2013 or earlier with approval.

If you have concerns with this change notice, Intersil must hear from you promptly. Please contact the nearest Intersil Sales Office or call the Intersil Corporate line at 1-888-468-3774, in the United States, or 1-321-724-7143 outside of the United States.

Regards,

Jeff Touvell
Intersil Corporation
