

RX Ecosystem Partner Solution

Edge Trust

Ubiquitous AI Corporation

Overview

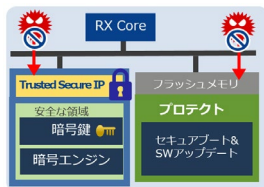

Edge Trust is a solution for enabling secure IoT services thanks to lifecycle management of IoT devices by digital certificate.

Key Features

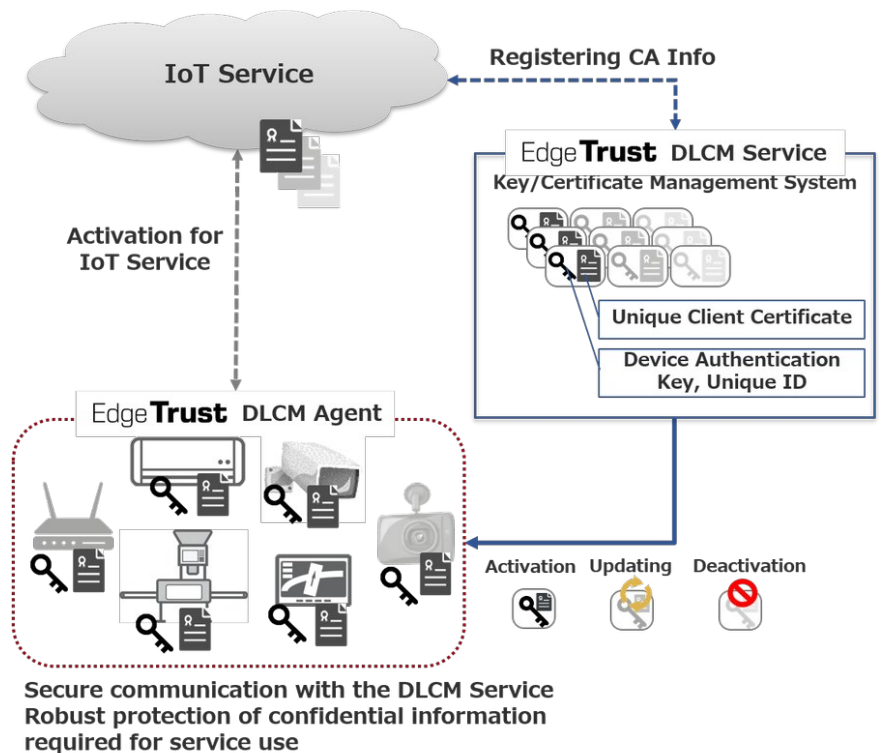

- Secure implementation of IoT devices using secure hardware and linkage of a key and certificate management systems enable secure and efficient product lifecycle management of IoT devices.
- One-stop solution for necessary functions of secure lifecycle management
- Enabling IoT Security by Ecosystem Frameworks
- Supporting [RX65N*](#)

* Obtained CMVP Level 3 Certification Under National Institute of Standards and Technology (NIST) FIPS 140-2 Security Standard

Solution Diagram

Edge Trust for RX will protect your confidential information and bring more robust IoT system by DLCM agent with RX's Trusted Secure IP (TSIP).

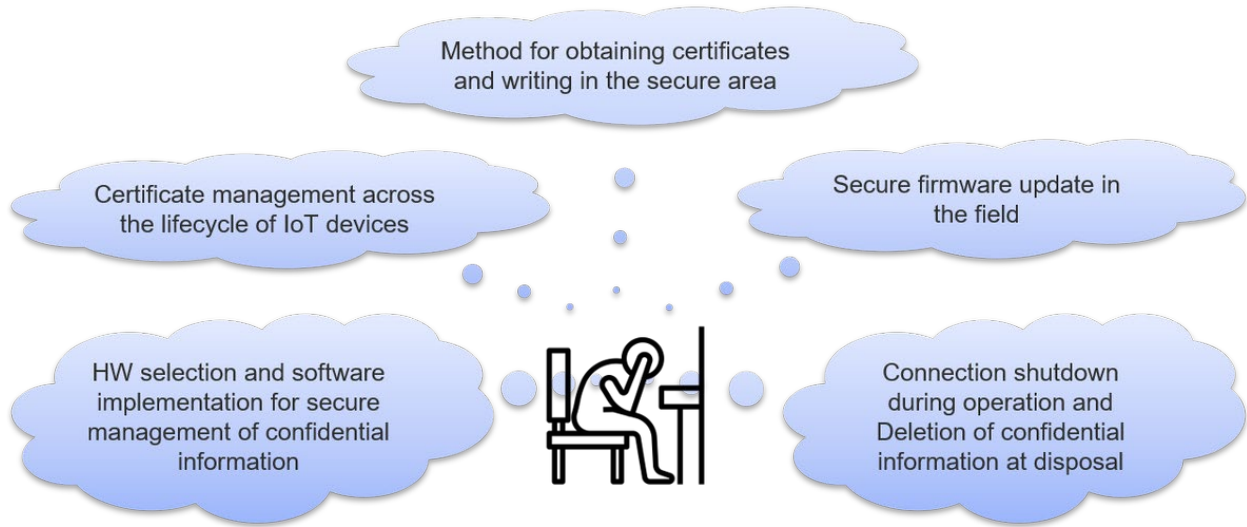

Target market / Use case

- Industrial devices, Infrastructure, Consumer IoT system.
- IoT service management, Impersonation protection, Discard or recycle management of IoT devices.

Ubiquitous AI Corporation

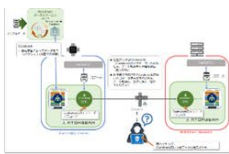

In developing a lifecycle management system for IoT devices

There is many difficulties and troublesome things

Edge**Trust** solves these issues !

Total solution and services to help IoT initial cost and safety, long term operation

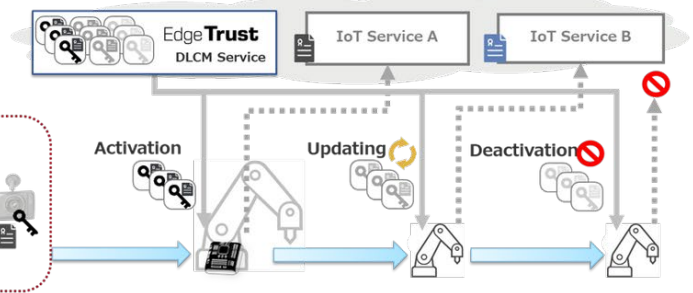

IoT data shrink, secure communication AI Solutions
【AtomBeam】

Blockchain-based Tamper-proofing through distributed ledger
【Business Blockchain Solutions】

Embedded software products and development support required for the IoT of electronic devices
Security implementation support for IoT devices
【Embedded Software Solutions】

Vulnerability Verification Tools
【beSTORM X】

Periodic health check service for IoT devices
【Edge Trust Health Check】

Security verification and consulting for IoT devices
【IoT Device Security Verification Service】
