

15<sup>th</sup> November 2021

Dear Valued Customer,

ANAUNCEMENT OF IATF RECERTIFICATION AT NAKA FACTORY

Due to the fire accident on March 19, 2021, the regular IATF 16949 recertification audit was cancelled. As a result, the Naka factory has lost certification under IATF regulations.

Production levels have returned to 100% of pre-fire levels. After a stable production period of three months, Naka factory was audited for IATF recertification from September 28<sup>th</sup> to October 1<sup>st</sup>, 2021.

On November 11, 2021, the Naka factory was recertified for IATF 16949.

We apologize for the time it took to recertify.

For the latest information, please see the press center announcement on the [Renesas website](#).

Sincerely yours,

Hiroshi Nagamizu, Vice President

Quality Assurance Division

Renesas Electronics Corporation
