The ISL97901 is a highly efficient four channel, 1.5A sequential LED driver powered from a single-cell Li-ion battery, or regulated input voltage up to 5.5V. The ISL97901 incorporates an independent current controlled driving mechanism for each of the LED’s to allow accurate brightness control.

The ISL97901 also utilizes a buck-boost converter to ensure optimum output voltage is maintained for a wide variety of LED forward voltages. The ISL97901’s highly integrated and efficient power conversion core operates at well over 90% efficiency across a wide range of operating conditions. The power conversion core implements a proprietary algorithm that allows seamless transitions and glitch-free operation between the buck and the boost modes as the battery voltage drops during operation.

The ISL97901 provides I/O pins to interface with Intersil’s optical sensor IC’s for white balance control. White balance is achieved by closing the opto-electrical loop which allows for LED light output to get calibrated against preset target values. The ISL97901 can also be configured to run in an open-loop manner if real-time white balance control is not desired. In this case, the LED currents are set by the internal registers.

**Features**
- Buck-Boost Based LED Driver
- RGB, RGGB or RGBW Color Sequencing
- Up to 1.5A Output Current
- Photo Detector Feedback Interface
- Dual Green LED Drive Support
- Closed-Loop White Balancing Dynamic Current Scaling
- Standby Current less than 70µA
- I²C Interface
- 150mV Feedback Voltage Reference for Current Regulation to Maximize Efficiency
- 2.5MHz Switching Frequency
- Programmable Output Voltage for each LED
- Dynamic Headroom Management
- Internal Current Setting Registers
- Ambient Temperature Range: 0 °C to +70 °C
- Pb-Free (RoHS Compliant)

**Applications**
- LED-Based Pico Projector In Mobile Phones
- Stand Alone Pico Projectors
- Tri-Stimulus Display Drivers
- Other Handheld Display Drivers
Intersil products are manufactured, assembled and tested utilizing ISO9001 quality systems as noted in the quality certifications found at www.intersil.com/en/support/qualandreliability.html

Intersil products are sold by description only. Intersil may modify the circuit design and/or specifications of products at any time without notice, provided that such modification does not, in Intersil's sole judgment, affect the form, fit or function of the product. Accordingly, the reader is cautioned to verify that datasheets are current before placing orders. Information furnished by Intersil is believed to be accurate and reliable.
