RENESAS Tool News

A Note on Using Flash Development Toolkit

When you use Flash Development Toolkit, take note of the following problem:

- With using script command Exit

1. Product and Versions Concerned

Flash Development Toolkit
  V.4.02 Release 00 through V.4.07 Release 00

2. Description

When you exit Flash Development Toolkit, the Application Crash
dialog box of Windows appears.

3. Conditions

This problem arises if the following conditions are all satisfied:
(1) The product concerned is running on Windows Vista(R) or
    Windows(R) 7.
(2) Script command Exit is used in the script file.
(3) The script file is executed by double-clicking the script
    configuration file (*.w4f).
    Or, the script file is executed by typing a command to open
    the script configuration file (*.w4f) on a command line.

4. Workaround

In Flash Development Toolkit, open the Tools menu and select Wait For
Script; then Run Configuration. The script configuration files (*.w4f)
appear.

By clicking this file, execute a script file.

5. Schedule of Fixing the Problem

We plan to fix this problem in the V.4.07 Release 01 product, which
will be published at the end of June 2011.
