## A Note on Using the High-performance Embedded Workshop --On Using the AutoUpdate Utility on Windows NT--

Please take note of the following problem in using the High-performance Embedded Workshop, an integrated development environment:

- On using the AutoUpdate utility on Windows NT
- 

### 1. Product Concerned

The High-performance Embedded Workshop V.4.00.00 included with the following products are concerned. They are provided with the AutoUpdate utility:

- (1) The M3T-NC308WA V.5.20 Release 02 C-compiler package  
(for the M32C/90, M32C/80, and M16C/80 series)
- (2) The M3T-NC30WA V.5.30 Release 02 C-compiler package  
(for the M16C/60, M16C/30, M16C/20, M16C/10,  
M16C/Tiny, and R8C/Tiny series)
- (3) The C/C++ compiler package V.9.00 Release 02 for the  
SuperH RISC engine family
- (4) The C/C++ compiler package V.6.01 Release 00 for the  
H8SX, H8S, and H8 families

For details of the AutoUpdate utility, go to RENESAS TOOL NEWS "The High-performance Embedded Workshop, an Integrated Development Environment, Provided with the AutoUpdate Utility" issued on March 16, 2005.

### 2. Description

In the High-performance Embedded Workshop V.4.00.00 running on Windows NT, the AutoUpdate utility does not function. When invoking the utility, you will see a message saying an application error has arisen. So, click the OK button in the message box to close

the utility.

### 3. **Solution**

This problem has already been resolved in the AutoUpdate utility included in the High-performance Embedded Workshop V.4.00.01, released on this April 1.

The update program to the High-performance Embedded Workshop V.4.00.01 is downloadable from **HERE**.
