# [Notes] e<sup>2</sup> studio Smart Configurator Plug-in, Smart Configurator for RX

## Outline

When using the e<sup>2</sup> studio Smart Configurator Plug-in and Smart Configurator for RX, note the following point.

1. Setting TPU0 channel of PWM Mode Timer

## 1. Setting TPU0 Channel of PWM Mode Timer

#### 1.1 Applicable Products

- ► RX Smart Configurator V1.2.0 or later
- ➢ e<sup>2</sup> studio V6.1.0 (Smart Configurator Plug-in V1.2.0) or later

#### 1.2 Applicable MCUs

▶ RX family: RX65N/RX651, and RX64M groups

## 1.3 Details

When you select the TPU0 channel as a resource from the [Software component configuration]  $\rightarrow$  [Software component selection] screen  $\rightarrow$  [PWM mode timer], the configuration panel would not display. You can display the TPU0 configuration panel by adjusting the width of the window, however even if you specify the TPU0 in the setting, the different source code is output. For this reason, the correct source code cannot be output.

## 1.4 Workaround

There is no workaround for this problem. Create a source code by referring to other channels such as TPU1 of the PWM mode timer.

# 1.5 Schedule for Fixing the Problem

This problem will be fixed in a later version.
