Application Leading Tool for RL78/L13 Published

We have published the Application Leading Tool for RL78/L13 V1.00.00, which is a generator for device driver codes.

1. Product and Version Concerned

For RL78/L13 group

- Application Leading Tool for RL78/L13 V1.00.00

2. Obtaining Product

Download the installer of the Application Leading Tool for RL78/L13 V1.00.00 from the following URL:

https://www.renesas.com/applilet_download

Then install it.

The installer will be published on this site on August 5, 2013.

The above URL is one of our global sites.

3. Notes

Note the following when using this product.

(1) Note on Creating a Project for IAR

When a project for IAR is created by the Application Leading Tool for RL78/L13 and then it is read and built in the IAR environment, an error message will be displayed but no error has actually occurred in some cases.

In such cases, after the error message is displayed, build the project again, and the error will no longer be displayed.

(2) Note on API Output when LCD Controller/Driver is Used

When the LCD controller/driver is used, the R_LCD_Voltage_On function is not output automatically.

To output it, select the LCD controller/driver in the code preview, right-click on R_LCD_Voltage_On, and select Generate Code from the context menu.
