The AutoUpdate Utility Revised to V.1.03.00

We have revised the AutoUpdate Utility from V.1.02.00 to V.1.03.00.

1. Description of Revision

The specifications of the AutoUpdate Utility have been modified as follows:
When running on Windows 98 SE, Me, or NT 4.0, the AutoUpdate Utility does not detect the update programs for the products supporting Windows 2000 and Windows XP that have already been released in January 2007 and will be released from now on.

We are discontinuing support for Windows Me, Windows 98, Windows 98 SE, and Windows NT 4.0 as OSes for running the Renesas-made software tool products released on and after January 1, 2007.
For details see RENESAS TOOL NEWS Document No. 061001/tn6.

For support programs of Renesas software tool products for Windows Vista, see RENESAS TOOL NEWS Document No. 070201/tn6.

2. How to Update Your Product

Update yours using its AutoUpdate Utility.
The update services using the AutoUpdate Utility will be provided on and after March 5.
Also you are able to update yours by downloading the update program of the product from the Web site and executing it.
This site will be opened from March 5 on.
