## The C/C++ Compiler Package (Windows Edition) for the SuperH RISC Engine MCU Family Revised to V.9.00 Release 04A

We have revised the Windows edition of the C/C++ compiler package for the SuperH RISC engine MCU family from V.9.00 Release 04 to V.9.00 Release 04A.

---

### 1. Revised Product

The C/C++ compiler package V.9 for the SuperH RISC engine family  
(Windows edition only)

### 2. Description of Revision

In the High-performance Embedded Workshop included with the compiler package, the AutoUpdate utility has been improved to detect the Document- Updater. Except for this, no changes have been made to the compiler itself and the High-performance Embedded Workshop.

#### About the DocumentUpdater

##### (1) Functionality of the DocumentUpdater

The DocumentUpdater is a utility that searches the database on the Renesas Web for documents related to the devices whose names have been entered in the High-performance Embedded Workshop and provides you with the search results in listed forms.

For details of the DocumentUpdater, see the section of Document-updater on the datasheet.

##### (2) How to Install the DocumentUpdater

The AutoUpdate utility automatically detects the program of the DocumentUpdater. If it is detected, follow the AutoUpdate utility's instructions if you want to install it.

(3) How to Invoke the DocumentUpdater

You see the icon of the DocumentUpdater on the toolbar of the High-performance Embedded Workshop. To invoke the DocumentUpdater, open a workspace and then click this icon, or select the Document- Updater command from the Help menu on the Toolbar.

### 3. How to Update Your Product and Purchase the Revised One

#### 3.1 Free-of-Charge Update

Free-of-charge update is available if you are using the product concerned.

To update yours online, download the update program from the Download site and execute it.

#### 3.2 Ordering Information

If you place an order for the product, please supply the following items of information to your local Renesas Technology sales office or distributor:

Version No.: V.9.00

Release No.: Release 04A

Host OS: Windows XP, Windows Me, Windows 98, Windows 2000, or Windows NT 4.0 (Windows edition)

For the price of the product, also contact the above.
