CubeSuite+'s Common Program Group Revised to V1.02.01

We have revised CubeSuite+'s Common Program Group from V1.02.00 to V1.02.01.

1. Your Product to Be Updated

CubeSuite+ whose common program group is of V1.02.00 or earlier

To check to see your product's version, follow these steps:

- (1) Start CubeSuite+.
- (2) On the Help menu, select the About command.
- (3) In the Version Information dialog box, see the version number of CubeSuite+.

Here the expression displayed is not CubeSuite+'s Common Program Group, but it shows the version number of this software.

2. Descriptions of Revision

2.1 Functions Introduced

The following functions have been introduced:

- (1) Displaying bits defined by the EQU pseudo-instruction in the Watch panel
When 78K0 MCUs are used, bits defined by the EQU pseudo-instruction can be registered and referenced on the Watch panel of the product's debug tool.
- (2) Extending the measurable time period of the system performance analyzer AZ
When programs are traced by using AZ together with the tracing function of in-circuit emulator IECUBE for the RL78 family or the 78K0R, the measurable time period of AZ has been extended.

2.2 Problems Fixed

The following known problems have been fixed:

- (1) With converting projects created by High-performance Embedded Workshop to those for CubeSuite+

For details, see RENESAS TOOL NEWS Document No. 120601/tn1 at:

<https://www.renesas.com/search/keyword-search.html#genre=document&q=120601tn1>

- (2) With operating the library generator, and with using compile options and link options (build options)

For details, see RENESAS TOOL NEWS Document No. 120605/tn1 at:

<https://www.renesas.com/search/keyword-search.html#genre=document&q=120605tn1>

- (3) With using the real-time RAM-monitoring function in on-chip debugging

For details, see RENESAS TOOL NEWS Document No. 120620/tn1 at:

<https://www.renesas.com/search/keyword-search.html#genre=document&q=120620tn1>

This Web page will be opened on July 2, 2012.

3. Updating Your Product

Online update is available free of charge. The methods of update depends on your product's edition, which are explained below.

3.1 Updating Commercial Edition of CubeSuite+

To update yours, use either of the following methods:

- (1) On the Start menu, select Programs and then Renesas Electronics CubeSuite+; then start Update Manager to update yours.

This service will be provided from July 2, 2012.

- (2) Download CubeSuite+'s common program group V1.02.01 from:

https://www.renesas.com/cs+_download

Then install it. This site will be opened on this July 5.

Two types of update program are available. Use either of them as necessary. They are as follows:

- (a) Full update program "CubeSuite+ common program V1.02.01"

Applied to update CubeSuite+'s common program group V.1.00.01 or later.

- (b) Differential update program "CubeSuite+ common program V1.02.01 Differential Update (from V1.02.00 to V1.02.01)"

Applied to update CubeSuite+'s common program group V1.02.00. The components of CubeSuite+'s common program group to which changes have been made in and after V.1.02.00 are updated;

3.2 Updating Evaluation Edition of CubeSuite+

To update yours, use the same method as 3.1-(1) or -(2).
