Device File Updater Specific to C/C++ Compiler Package for RX Family Revised to V.1.06 (specific to integrated development environment High- performance Embedded Workshop)

We have revised the device file updater specific to the C/C++ compiler package for the RX family of MCUs from V.1.05 to V.1.06. For an overview of device file updaters, see:

<https://www.renesas.com/dfu>

The above URL is one of our global sites.

1. Compiler and Versions to Be Updated

C/C++ compiler package for RX family

V.1.01 Release 00 through V.1.02 Release 01

2. Description of Revision

Startup files have been updated.

The descriptions of registers in the `iodefine.h` files for the following MCU groups have been updated to those in the hardware manuals with the version numbers specified at the beginnings of the above header files:

- RX210

The version number of the hardware manual is Rev.1.40.

- RX630

The version number of the hardware manual is Rev.1.50.

- RX63N

The version number of the hardware manual is Rev.1.60.

- RX63T

The version number of the hardware manual is Rev.2.10.

3. Obtaining Revised Product

Download Device File Updater V.1.06 specific to the C/C++ compiler package for the RX family from:

https://www.renesas.com/dfu_download

Then install it. The installer will be published on the Web site on December 20.
