The Device File Updater Specific to the C/C++ Compiler Package for the SuperH RISC engine Family Revised to V.1.15

We have revised the device file updater specific to the C/C++ compiler Package for the SuperH RISC engine Family from V.1.14 to V.1.15.
For an overview of device file updaters, see:
https://www.renesas.com/dfu

1. Compiler and Versions to Be Updated

The C/C++ Compiler Package for the SuperH RISC engine Family
   V.9.00 Release 00 or later

Note, however, that to install the device file updater V.1.15 on
your PC, you must install the V.9.03 Release 02 or later product of
the above compiler package in advance.
For details, see Note 1 on the web page at:
https://www.renesas.com/dfu_env_info

2. Description of Revision

The sample files created by selecting the following CPUs have been modified:
   - SH7253
   - SH72533

3. How to Obtain the Product

Download the installer of the device file updater V.1.15 for
the C/C++ compiler package for the SuperH RISC engine Family from:
   https://www.renesas.com/dfu_download
