The Device File Updater Used for the C Compiler Package for the M16C Series, R8C Family of MCUs (M3T-NC30WA) Revised to V.1.04

We have revised the device file updater used for the C compiler package for the M16C series, R8C family of MCUs (M3T-NC30WA) from their V.1.03 to V.1.04.

For overviews of the device file updater, see:

<https://www.renesas.com/dfu>

The above URL is one of our global sites.

1. Compliant Environment

This device file updater V.1.04 operates in combination with the C compiler package for the M16C series, R8C family of MCUs (M3T-NC30WA) V.5.42 Release 00 or later. Note, however, that to install the device file updater on the PC, you must have installed a C compiler package V.5.45 Release 00 or later.

2. Descriptions of Revision

The following CPUs can be selected from the CPU Types list:

- R8C/33D, R8C/35D, R8C/33T, R8C/36C, R8C/38C and R8C/3JC

The function to consider on-chip debugger is updated in the following CPUs:

- R8C/L3AA and R8C/34C

The generated sfr files are not modified.

3. How to Obtain the Product

Download the device file updater V.1.04 for the M3T-NC30WA compiler package from:

https://www.renesas.com/dfu_download

Then install it on your PC. This Web site will be opened from June 21.
