RENESAS Tool News

Device Support Extended in Real-Time OS RI600PX for RX Family

We have extended the Device support in the real-time OS RI600PX for the RX family of MCUs.

1. Device Support

The RX200 series of MCUs equipped with memory protection unit have been added to the support line of RI600PX V1.01.00.
You need not update your RI600PX to V1.01.00; you can use it as before.

2. Device Support in Timer Template Files

The following MCUs have been added to the support lines of the timer template files included in RI600PX V1.01.00:

Template File	Newly supported MCUs
rx62n.tpl	- RX621 group, RX600 series - RX62T group, RX600 series (RX62N group already supported)
rx630.tpl	- RX631 group, RX600 series - RX63N group, RX600 series - RX63T group, RX600 series - RX21A group, RX200 series (RX630 group already supported)

You can use the existing rx62n.tpl and rx630.tpl files for the above MCUs.
