## An E6000 Emulator Software Product for the H8S MCU Family Revised to V.6.01 Release 00

The emulator software for the E6000 emulator HS2646EPI61H has been revised to V.6.01 Release 00. The emulator and emulator software are used for the H8S/2282, H8S/2630, H8S/2635, H8S/2636, H8S/2638, H8S/2639, H8S/2646, H8S/2648, and H8S/2607 groups, H8S MCU family.

---

### 1. Product and Versions to Be Updated

Product: Emulator software for the E6000 emulator HS2646EPI61H  
(used for the H8S/2282, H8S/2630, H8S/2635, H8S/2636,  
H8S/2638, H8S/2639, H8S/2646, H8S/2648, and H8S/2607 groups)  
Versions: V2.0.00 through V.6.00 Release 00

NOTICE: If you are going to update any of the versions earlier than  
the above, see Section 3 below.

### 2. Description of Revision

The following devices have been added to the support line:  
H8S/2280B and H8S/2280RB (H8S/2280 group)

### 3. About the Versions to Be Updated

The versions to be updated (described in Section 1) are supported by High-performance Embedded Workshop. On the other hand, the versions earlier than those to be updated are of the HDI edition. Though the versions of the HDI edition can also be updated, note that they will run only with High-performance Embedded Workshop if updated. The version of your emulator software can be informed by checking for the version number of E6000 Target Platform. If yours is any of the versions to be updated, the version number of E6000 Target Platform will fall in a range from V2.0.00 to V.6.00 Release 00.

To check for the version number of your E6000 Target Platform, perform the following procedure:

- (1) In High-performance Embedded Workshop, open the Tool menu and select the Administration command. The Administration dialog box appears.
- (2) In the Registered Components list, open the Debugger Components folder, and you see the version number of your E6000 Target Platform.

#### **4. How to Update Your Product**

Free-of-charge online update is available.

Use AutoUpdate Utility or use the following procedure:

- (1) Download the update program, a ZIP file, of the latest version from the Web site (this site will be opened from December 5 on).
- (2) Decompress the downloaded ZIP file to obtain the install program (the HewInstMan.exe file) and execute it.

#### **5. Notice**

If the install program is executed in the system where High-performance Embedded Workshop V.4.02.00 or earlier resides, the IDE will be updated to V.4.03.00.
