The Emulation Pod, QB-V850E2FX4H-PD, for the IECUBE2 Upgraded

We have upgraded the emulation pod QB-V850E2FX4H-PD, which is used for the in-circuit emulator IECUBE2 (QB-V850E2.)

The QB-V850E2FX4H-PD and IECUBE2 are used to debug systems designed with the V850E2M MCUs.

1. To Be Updated

QB-V850E2FX4H-PD products with the following revision control code:
- 10 alphanumeric characters starting with R. (ex. RA*****)

The control code is inscribed on the backside of the top cover.

"Rev Up B" label will be attached to each product once the updating is complete.

2. Description of Upgrade

The following problem has been resolved: in high-speed communication using Ethernet, communication speed out of the guaranteed range of operation.

3. Updating Your Product

We update your QB-V850E2FX4H-PD free of charge. Please contact your local Renesas Electronics marketing office or distributor.

The effective dates of application are as follows:

From September 12, 2011, to September 11, 2012, inclusive

NOTICE: An additional charge will be made after the effective dates expire.
