RENESAS Tool News

The Emulator Software for the E200F Emulator R0E0200F1EMU00 Revised to V.2.04 Release 00

We have revised the emulator software for the E200F emulator R0E0200F1EMU00 from V.2.03 Release 00 to V.2.04 Release 00.
The emulator software and the emulator are used for the SH7080, SH/Tiny, SH7146, SH7147, SH7200, and SH7210 series, SuperH RISC engine family (these series are all SH-2-CPU- or SH-2A-CPU-cored).

1. Descriptions of Revision

(1) The following MCU groups have been added to the support line:

```
Group      Series
-------------------------------------------------------
SH7285     SH7280
SH7263     SH7260
SH7243     SH7243
SH7203     SH7200
```

(2) The install manager has been introduced.
    For the install manager, see RENESAS TOOL NEWS Document No. 061001/tn2, "The Install Manager Introduced to Some Products with Which the High-performance Embedded Workshop Bundled," on the Web page at
    http://tool-support.renesas.com/eng/toolnews/061001/tn2.htm

2. How to Update Your Product

Free-of-charge online update is available. If you are using the product concerned, use the Autoupdate utility (will be available on and after July 20) or perform the following procedures:

(1) Download the update program (ZIP file) of the product from the Web site. This site will be opened from this July 20 on.

The above site is that of our global site (in English).

(2) Decompress the downloaded ZIP file to obtain the install program
(HewInstMan.exe file); then execute it.

3. Notice

If the install program in 2 (2) above is executed in the system where
High-performance Embedded Workshop V.4.01.01 or earlier resides,
it will be updated to V.4.02.00.
