

A Hardware Tool Released in the Last Half of November 2010

We released a hardware tool described below in the last half of November 2010.

1. An Adaptor for the RX Family of MCUs

R0E000010CKZ11: A small connector conversion adaptor for the E1 emulator. The R0E000010CKZ11 adaptor connects the 14-pin 2.54-mm-pitch connector attached to the end of the user-interface cable of the E1 emulator with the 14-pin 1.27-mm-pitch connector by converting the 2.54-mm pitch to the 1.27-mm one.

By using this adaptor, you can mount on a small footprint the connectors connected with the emulator and used for evaluating user systems.

For details of the product, see its user's manual on the Web page at:
