RENESAS Tool News

Hardware Tools Released in First Half of February 2015

We released the hardware tools described below this February.

---

1. For the RL78/D1A Group of the RL78/D1x Series
   IECUBE QB-RL78D1A2-ZZZ

   This is an in-circuit emulator for the debugging of hardware and
   software in the development of systems in which the R5F10DPL, R5F10DPK,
   R5F10DSL, R5F10DSK, or R5F10DSJ is used.

   Note: MCUs other than the R5F10DPL, R5F10DPK, R5F10DSL, R5F10DSK,
       and R5F10DSJ are supported by QB-RL78D1A-ZZZ.
       Refer to the following URL for details.
         https://www.renesas.com/iecube/rl78

   For details of the new product, see its user's manual at the link on
   the web page below.
