

RENESAS TOOL NEWS on June 1, 2012: 120601/tn14

Hardware Tools Released in May 2012

We released the hardware tools described bellow in this May.

1. For MCUs of RX630 Group, RX600 Series, RX Family Debug MCU boards R0E55630EDMB00 and R0E55630EDMB01

By connecting these boards to the E20 emulator, you can use all the user ports of the MCUs involved when you debug your systems. The types of board to use depend on the packages of MCUs as follows:

For 144 pin 0.5-mm-pitch package: R0E55630EDMB00

For 100 pin 0.5-mm-pith package: R0E55630EDMB01

For details of the products, see the following manuals:

(1) R0E55630EDMB00 User's Manual

This will be published on June 1, 2012, at [here](#).

(2) R0E55630EDMB01 User's Manual

This will be published on June 1, 2012, at [here](#).

Ordering information:

Product type	Type name
--------------	-----------

R0E55630EDMB00	As left
----------------	---------

R0E55630EDMB01	As left
----------------	---------

2. For MCUs of RL78/L12 Group, RL78/Lx Series, RL78 Family CPU board QB-R5F10RLC-TB

By using this CPU board together with the E1 emulator, you can evaluate systems designed with MCUs of the RL78/L12 group.

For details of the products, see the user's manual on the Web page at [here](#).

Ordering information:

Product type	Type name
--------------	-----------

QB-R5F10RLC-TB	As left
