An MCU Unit--R0E530650MCU00-- for the E100 Emulator Released (the MCU Unit Specific to the M16C/65 and M16C/64A MCU Groups)

We have released an MCU unit, R0E530650MCU00, for the E100 emulator. This MCU unit is specific to the M16C/65 and M16C/64A MCU groups

1. Outline of the Product

The R0E530650MCU00 MCU unit is used to debug systems designed with MCUs of the M16C/65 and M16C/64A groups, M16C/60 series in combination with the E100 emulator.

For details of the product, go to:

<http://www.renesas.com/e100/r0e530650mcu00>

For information about the E100 emulator, go to:

<http://www.renesas.com/e100>

2. The Contents of the Product Package

- (1) An MCU unit R0E530650MCU00
- (2) A flexible cable (already connected with the MCU unit)
- (3) A 20-MHz oscillator module (already mounted on the MCU unit)
- (4) A CD-ROM containing the M16C R8C E100 Emulator Software

To debug your systems, you need to use the optional converter board for connecting the target system with the flexible cable. The product type of the converter board to use is dependent on the MCU in your system.

For information about the converter boards involved, go to:

http://www.renesas.com/e100_m16cf_eo

3. How to Purchase the Product

When you place an order for the product, supply the following items

of information to your local Renesas Technology sales office or distributor:

Product type:	R0E530650MCU00
Type name:	As above

For the price of the product, also contact the above sales office or distributor.

4. About the WS Product of the MCU Unit R0E530650MCU00

The WS product of the R0E530650MCU00 is not different from its commercial one in any items of functionality. So you can use it as it is if you are using it.

However, the WS product contains the previous version of M16C E100 Emulator Software (see NOTE). So update it to the M16C R8C E100 Emulator Software V.1.01 Release 00 by downloading it from:

http://www.renesas.com/e100_download

NOTE:

M16C E100 Emulator Software was renamed to M16C R8C E100 Emulator Software at the same time as its revision from V.1.00 Release 00 to V.1.01 Release 00.
