

The Simulator Debugger for the H8SX, H8S, and H8 MCU Families Revised to V.5.08.00

We have revised the simulator debugger for the H8SX, H8S, and H8 MCU families from V.5.07.00 to V.5.08.00. This simulator debugger is included in the C/C++ compiler package for the H8SX, H8S, and H8 MCU families.

1. Descriptions of Revision

1.1 Capabilities Introduced

The following capabilities have been introduced:

- Updating the Memory window periodically during execution of the user program
- Simulating systems designed with the H8SX V2 core(H8SX/1720 group)

1.2 Problem Fixed

The problem reported in RENESAS TOOL NEWS Document No. 090316/tn1 ("With setting the clock rate for the peripheral functions," published on March 16, 2009) has been fixed. For details see:
<http://tool-support.renesas.com/eng/toolnews/090316/tn1.htm>

2. How to Update Your Product

Online update is available free of charge. Update yours in either of the following ways:

(1) Use AutoUpdate Utility. This service is available on and after June 10, 2009.

(2) Download the update program of the product from:
http://www.renesas.com/h8_sim_download

Then execute it. This site will be opened from June 5, 2009, on. The above URL is that of our global site (in English).

3. Notices

(1) This simulator debugger is a component of the C/C++ compiler package for the H8SX, H8S, and H8 families. So it is not available alone.

- (2) Only the simulator debugger is updated by the update described in 2.
- (3) The simulator debugger can be updated in the development system where High-performance Embedded Workshop V.4.05.01 resides. So if you have not already installed this IDE, install it in advance.
